Welcome!

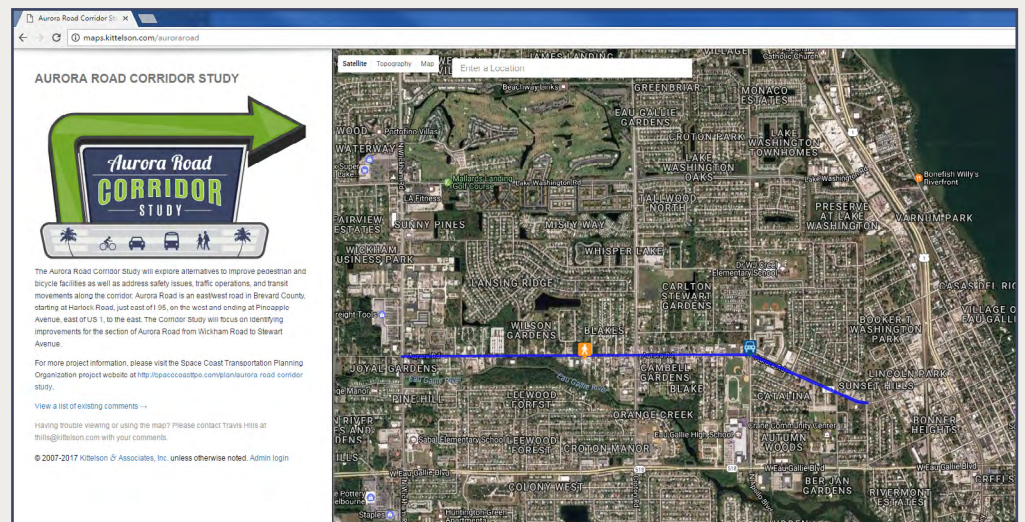

Welcome to the Aurora Road Corridor Study Existing Conditions Public Meeting! The study, which is the first phase in the transportation development process, is exploring alternatives to improve pedestrian and bicycle facilities as well as address safety issues, traffic operations, and transit movements from Wickham Road to Stewart Avenue.

This public meeting is the first of three workshops being held throughout the 18-month planning study. The purpose of this meeting is to present initial findings related to existing conditions and receive input from interested stakeholders.

Your Input is Valuable!

Anyone wishing to submit comments or concerns may do so at this meeting, or by visiting our interactive Map at maps.kittelson.com/auroraroad. The public comment period will remain open until close of business May 30, 2017.
