Space Coast Transportation Planning Organization

RESOLUTION # 23-02

Transportation Improvement Program (TIP)

A RESOLUTION, adopting the Space Coast Transportation Planning Organization's Fiscal Year 2022/23 to 2026/27 Transportation Improvement Program (TIP) for the Palm Bay-Melbourne and Titusville Urbanized Areas.

WHEREAS, the Space Coast Transportation Planning Organization is the designated and constituted body responsible for the urban transportation planning and programming process for the Palm Bay-Melbourne and Titusville Urbanized Areas; and

WHEREAS, Florida Statutes 339.175; 23 U.S.C. 134; and 49 U.S.C. 5303 require that the urbanized area, as a condition to the receipt of federal capital or operating assistance, have a continuing, cooperative and comprehensive transportation planning process that results in plans and programs consistent with the comprehensively planned development of the urbanized areas; and

WHEREAS, the Transportation Improvement Program (TIP) is hereby endorsed as an accurate representation of the areas priorities as developed through the planning process carried on cooperatively by the state and local communities in accordance with the provisions of 23 U.S.C. 134.

WHEREAS, the BOARD'S registered Agent in Florida is Andrea Young, Space Coast TPO Chair. The registered Agent's address is: 2725 Judge Fran Jamieson Way, Building B, Room 105, Melbourne, FL 32940; and

NOW THEREFORE, BE IT RESOLVED by the Space Coast Transportation Planning Organization adopts the Transportation Improvement Program for Fiscal Year 2022/23 to 2026/27, and authorizes staff to submit the TIP to all appropriate individuals and agencies.

Passed and duly adopted at a regular meeting of the Space Coast Transportation Planning Organization Governing Board on the 14th day of July, 2022.

Certificate

The undersigned duly qualified as Chair of the Space Coast Transportation Planning Organization Governing Board certifies that the foregoing is a true and correct copy of a Resolution adopted at a legally convened meeting of the Space Coast Transportation Planning Organization Governing Board.

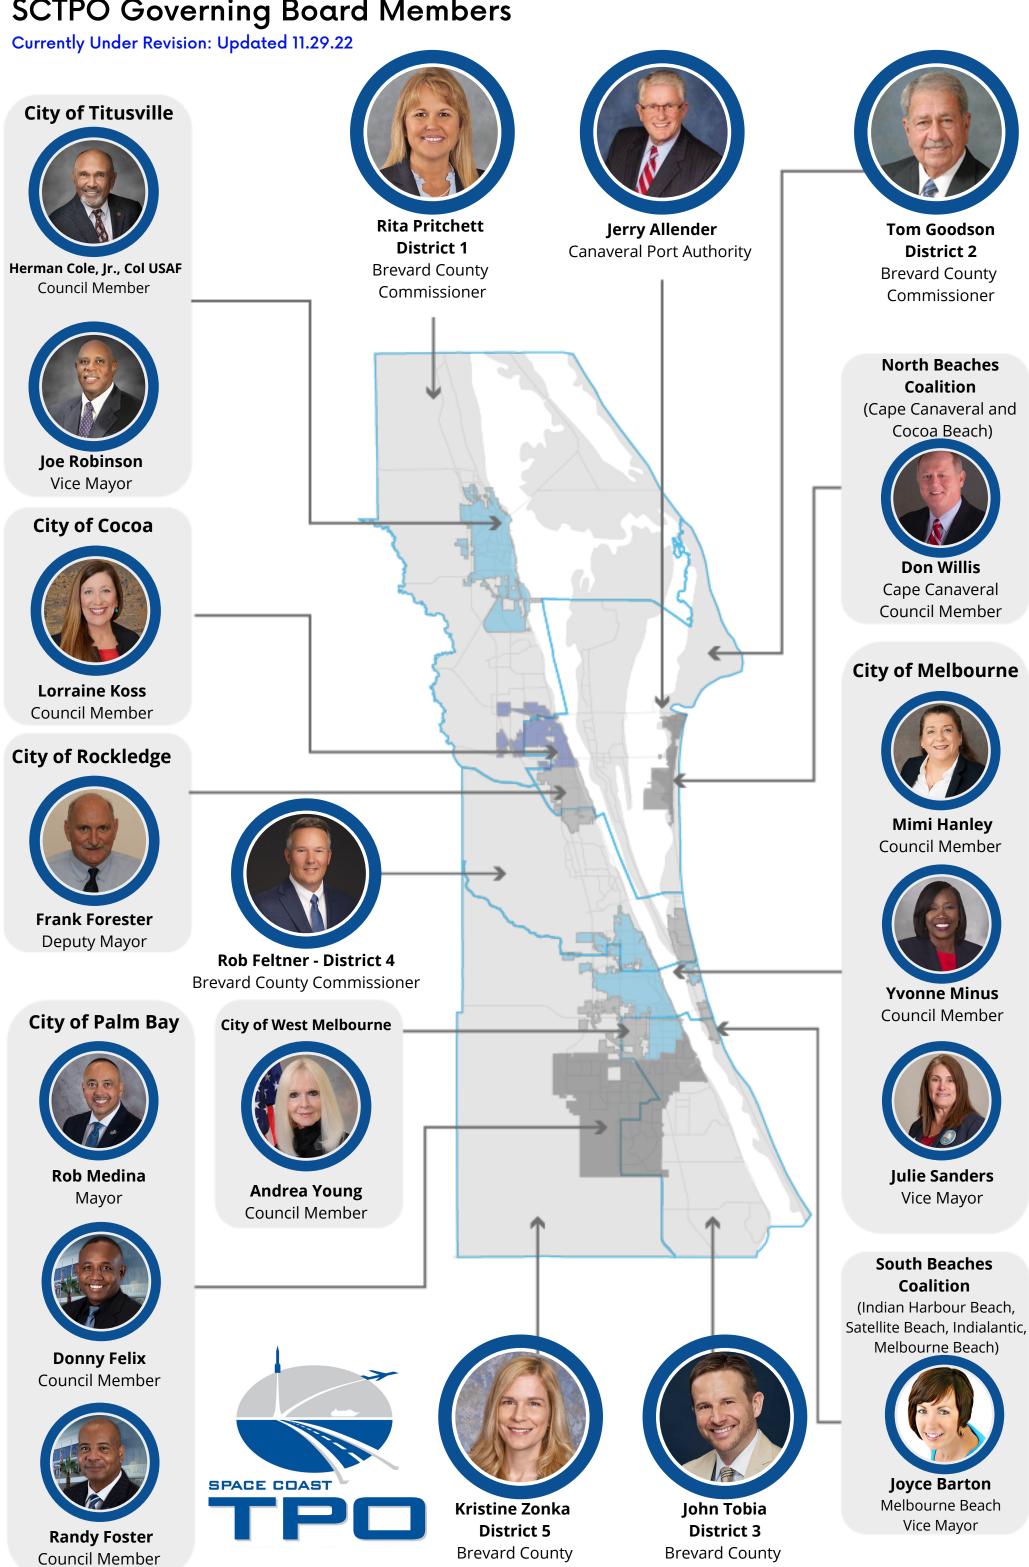

Andrea Young

Space Coast TPO Governing Board Chair

Robert L. Jordah, Jr.

Space Coast TPO Governing Board Secretary

SCTPO Governing Board Members

Commissioner

Commissioner

How is Brevard County's transportation system unique?

Brevard is quintimodal as its system is comprised of roadways (includes cars, bicycles, pedestrians, and transit), airports, a seaport, a spaceport and a rail system. Brevard's economy is largely built on and around these transportation assets

What is the role of the Space Coast Transportation Planning Organization (Space Coast TPO)?

The Space Coast TPO is governed by federal and state law. Areas with a population more than 50K must have a TPO to spend federal transportation funds. A TPO is created to look at the big picture of transportation planning – helping to assist in the communication and coordination among the different modes and municipalities. The Space Coast TPO works with the public, its board of elected officials, committee members, government agencies, and multimodal organizations to identify transportation needs and advance transportation projects.

What is the Transportation Improvement Program (TIP)?

- > The **Transportation Improvement Program** (TIP) lists each transportation project to be implemented over the next five years. The TIP is a realistic forecast of projects that have committed state or federal funds so it serves as the SCTPO's short range plan. The list of funded transportation projects is developed annually with input from the community and updated throughout the year.
- > TIP projects are scheduled by year and by phase. There are several phases of transportation development including: feasibility to determine best options; project development and environment; design; right of way acquisition; and finally, construction.

TIP Highlights

- Lists priority projects from the Long Range
 Transportation Plan (LRTP).
- Provides 5-year implementation schedule.
- Becomes part of the statewide TIP (STIP).
- Adopted every year
- There is a 30-day public comment period on the draft TIP prior to adoption.

How is the TIP funded?

TIP projects are funded through a combination of local, state, and federal transportation funds. Federal funds are administered through the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA). The TIP allocates state and federal funds for capital projects to include roadway widening, intersection improvements, bicycle facilities, sidewalks, trails, safety projects, space, port, transit, and airport.

How can you participate in developing the TIP?

- > Members of the public can comment on specific projects during public meetings such as at TPO Governing Board, TAC, and CAC meetings.
- > Visit the Space Coast TPO website often at www.spacecoasttpo.com and click "Plans/Programs, and select "Transportation Improvement Plan" from the drop down menu.
- > Prior to the adoption of the TIP, the Space Coast TPO hosts an annual public meeting, to review the proposed TIP, in May or June of each year.
- > Comments and questions may be submitted by:
 - Email: georganna.gillette@brevardfl.gov
 - Phone: 321-690-6890
 - In writing: Attn: Executive Director, Space Coast TPO 2725 Judge Fran Jamieson Way Building B, Room 105 Melbourne FL 32940

How to Read the TIP Project Listings

FM # is a 7 digit Work Program Financial Management number assigned by the Florida Department of Transportation (FDOT).

LRTP # is the page number the project is found in the TPO's Long Range Transportation Plan.

Roadway & Project Limits describes the project roadway and the beginning and ending locations of the project.

Project Length is the length of the work area in miles, not available for all projects.

Work Description is a brief description of the action or work being performed.

Responsible Agency is the agency responsible for managing the project.

Prior Years Cost is the historical cost information for projects having expenditures paid by FDOT prior to FY 2021.

Future Years Cost is five years of programming in the FDOT Work Program for Non-SIS; 10 years of programmed costs for Strategic Intermodal Systems Projects (SIS).

Total Project Costs: DISCLAIMER: represents 10 years of programming in the FDOT Work Program for projects on the Strategic Intermodal System (SIS) (FY 2023 through 2027), and 5 years of programming in the FDOT Work Program for Non-SIS projects (FY 2023 through 2027), plus historical cost information for all projects having expenditures paid by FDOT prior to FY 2023.

Phase is the primary phase of the project; e.g., Project Development and Environment (PD&E), Design (PE), Right of Way (ROW) and a Construction Phase (CST).

Fund Source describes the funding source for Federal, State, or Local funds. See Funding Legend.

Funding (000's) is the amount programmed in the FDOT Work Program by Fiscal Year in thousands of dollars inflated to the year that the funds are expended based on reasonable inflation factors.

Space Coast Transportation Planning Organization Transportation Improvement Program FY 2023 – FY 2027

EXECUTIVE SUMMARY

JULY 2022

EXECUTIVE SUMMARY

The Space Coast Transportation Planning Organization (TPO) is the designated and constituted body responsible for the urban transportation planning and programming for the Palm Bay-Melbourne-Titusville Urbanized Area. Brevard County has the distinction of serving five modes of travel; land, air, sea, rail and space. The Space Coast TPO serves the citizens of Brevard County, located on the east coast of central Florida and is bordered on the north by Volusia County, on the south by Indian River County, and on the west by Seminole, Orange, and Osceola counties. Brevard's eastern borders the Atlantic Ocean.

According to the U.S. Census Bureau Quick Facts, the 2016 total estimated populations for Brevard County were 579,130. There are 16 incorporated municipalities that the Space Coast TPO serves along with major modal agencies such as the Orlando-Melbourne International Airport, Space Florida, Cape Canaveral Air Force Station, Port Canaveral and Patrick Air Force Base. According to the Space Coast Area Transit's 2018-2027 Transit Development Plan, nearly 94 percent of Brevard's households have at least one vehicle available to them. With such a significant portion of the population with vehicles it is important for the TPO to ensure that transportation planning is coordinated among all agencies in a continuous, cooperative and comprehensive manner and serves all modes and needs.

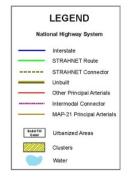

In 2013 the Space Coast TPO's Urbanized Area Boundary (UAB) was revised and updated with 2010 Census data (See Figure 1). The TPO serves two UAB's, the Palm Bay-Melbourne and Titusville urbanized areas and small area within Brevard County boundary of the Sebastian-Vero Beach South – Florida Ridge UAB. Only minor adjustments were made with the Space Coast TPO continuing to serve all of Brevard County.

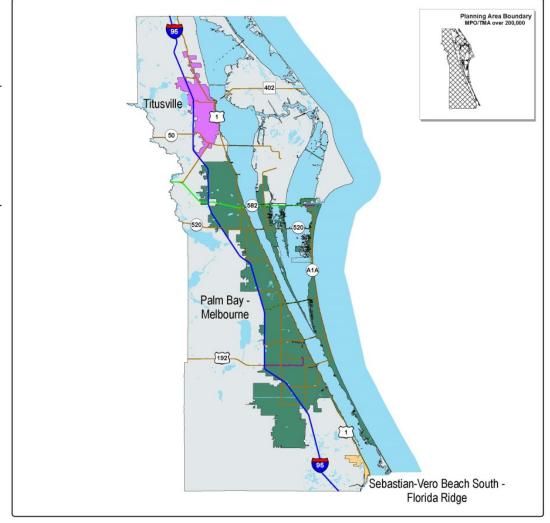

The Space Coast TPO and the Florida Department of Transportation (FDOT) District Five Planning Office work cooperatively to ensure that major transportation issues are addressed and that the requirements in state and federal law governing the metropolitan transportation planning process are fully met.

Figure 1. Brevard Urbanized Area and Planning Boundary

District 5 BREVARD COUNTY

U.S. Census Bureau	
Urban Areas	2010 Population
Palm Bay-Melbourne	452,791
Sebastian-Vero Beach South-	
Florida Ridge	149,422
Brevard County (Part)	8,626
Titusville	54,386

Financial Plan

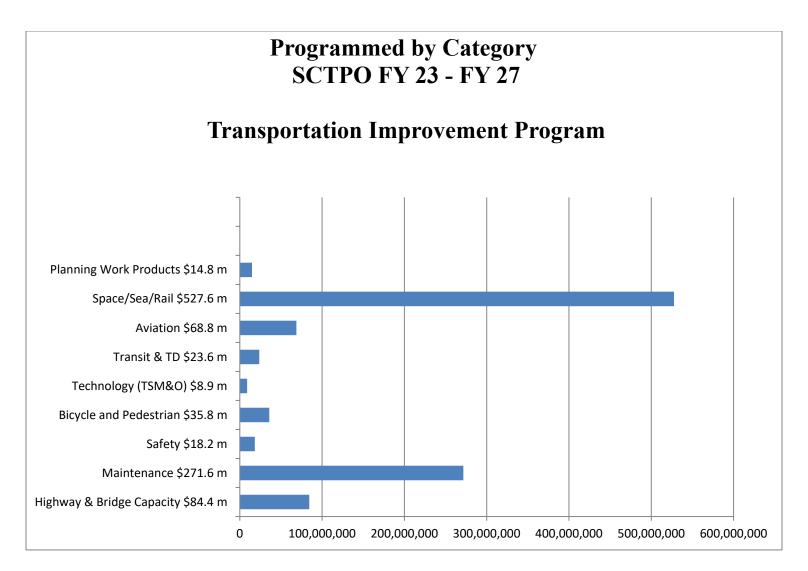

The projects within the TIP are financially feasible and financially constrained for each year, and the federal- and state-funded projects in this document can be implemented using current and proposed revenue sources that are reasonably expected to be in place when needed, based on the FDOT Final Work Program for FY 2023 - 2027 and locally dedicated transportation revenues.

The Florida Department of Transportation (FDOT) uses the latest project cost estimates, and the latest projected revenues based on a District-wide statutory formula (50% population and 50% motor fuel tax collections) to implement projects within the county in the Five Year Work Program. Fund amounts are also based upon (a) the Federal Aid Forecast, (b) the Transportation Revenue Estimating Conferences (REC) projection of state funds and (c) Bond, Toll, Local Funds and reimbursables contained in the Finance Plan. The TIP is also constrained as a result of local funds from the local governments Capital Improvement Programs committed to certain projects in the TIP.

When developing the TIP, the TPO, State, and Space Coast Area Transit (the local transit operator in Brevard County) develop estimates of funds that are reasonably expected to be available. Projects in the TIP are presented in Year of Expenditure (YOE), which takes into account the inflation rate over the five years in the TIP. The programmed cost estimate for each project is therefore inflated to the year that the funds are expended based on reasonable inflation factors developed by the State and its partners.

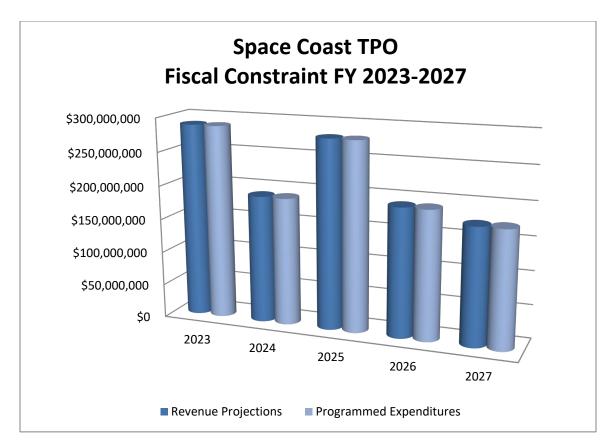

The projects identified in this TIP are funded with Federal, State and Local revenues. The FDOT Adopted Work Program Fiscal Year 2023 – 2027 specifies revenue sources for each project. Figure 1 illustrates the Space Coast TPO's TIP total funding by year and mode of transportation.

Figure 2 illustrates fiscal constraint and compares FDOT's Fund Summary (revenue projections) with the Adopted Five Year TIP (programmed expenditures). The total funding fluctuates from one fiscal year to another based on the size and number of projects programmed in that year.

Funds are rounded and shown in millions.

Actual Total is \$1,121,254,291

FISCAL CONSTRAINT	2023	2024	2025	2026	2027
PROGRAMMED EXPENDITURES (See Adopted TIP – Total Programmed Project Estimates)	\$288 M	\$189 M	\$280 M	\$190 M	\$173 M
REVENUE PROJECTIONS (Tentative Work Program – FDOT Fund Summary)	\$288 M	\$189 M	\$280 M	\$190 M	\$173 M

Full Project Costs and Other Project Details

The normal project production sequence is to have a Project Development and Environment (PD&E) phase, a Design (PE) phase, a Right of Way (ROW) phase and a Construction (CST) phase. Some projects may not have a ROW phase, if land is not needed to complete the project. For any project scheduled to start within the 5-year time frame covered by the TIP, if any phase of the work will be conducted in years beyond that time frame, only the project costs within the first five years are shown in the 5-year funding table for that project. For phases of the project that are beyond that time-frame, the project must be in the fiscally constrained Long Range Transportation Plan (LRTP) and the estimated total project costs will be described within the financial element of the LRTP. In those cases, the TIP includes a reference to the location in the LRTP where the estimate can be found beginning on Page 142. 2045 Long Range Transportation Plan

Projects on the Strategic Intermodal System (SIS)

The SIS is a network of high priority transportation facilities which includes the state's largest and most significant commercial service airports, spaceport, deep-water seaports, freight rail terminals, passenger rail and intercity bus terminals, rail corridors, waterways and highways. All projects on the SIS will have a SIS identifier on the TIP page.

Costs on the TIP pages for projects on the SIS will have historical costs, five years of the current TIP, and five years beyond the current TIP, which may or may not be the total project costs. If there is not a Construction (CST) phase, then the entry will probably not be reflective of the total project costs. For some projects, such as resurfacing, safety or operational projects, there may not be a total cost provided but rather additional details on that program.

For costs beyond the ten year window, please reference the Space Coast TPO's Long Range Transportation Plan (LRTP) beginning on Page 142. 2045 LRTP Cost Feasible Plan The LRTP reference on the TIP page provides the information necessary to locate the full project costs and/or additional details regarding the project.

Non-SIS Projects

Total project costs and other project details will be accessible in the TIP for all non-SIS projects in the TIP. All projects not on the SIS will have a non-SIS identifier on the TIP project page.

Costs on the TIP project pages for projects not on the SIS will have historical costs and five years of the current TIP, which may or may not be the total project cost. If there is no Construction phase, then the entry will probably not be reflective of the total project cost. For some projects, such as resurfacing, safety or operational projects, there may not be a total cost provided but rather additional details on that program.

For costs beyond the five year window for Non-SIS projects, access to the Space Coast TPO's Long Range Transportation Plan (LRTP) beginning on Page 143. LRTP Cost Feasible Non-SIS

How are Projects Selected and Prioritized?

The development of the TIP is a 12-18 month process and is consistent with the federal requirements in 23 C.F.R. 450.332 (b) (c).

- ✓ Solicitation of Projects. In the late spring of each year, the TPO solicits requests for state and federally funded candidate projects from local governments and transportation agencies, including Space Coast Area Transit, the Valkaria Airport, Melbourne International Airport, Titusville-Cocoa Airport Authority, Canaveral Port Authority and Space Florida. Local governments and transportation agencies are encouraged by the TPO to have project requests adopted by their Council, Commission or Board to ensure agency and public support for the requested projects.
- ✓ Ranking of Projects. There are many factors considered when developing the Project Priorities List, including: the approved Long Range Transportation Plan (LRTP), the Strategic Intermodal System (SIS) Plan, the historic standing of projects within the Project Priority List, prior funding commitments and the TPO's Public Participation Plan. Results of the Annual State of the System (SOS) Report, prepared annually to meet the requirements of the Congestion Management System, are also examined for such factors as hurricane and other emergency evacuation needs, crash history and public safety, regional connectivity, and current/ future traffic volumes and level of service standards.

The Transportation Subcommittee (TSC), comprised of staff planners and engineers from all Brevard County local governments, meets in spring/ early summer of each year to review the status of the previous year's priorities and to evaluate new project requests. The TSC develops a Draft Project Priority List recommendation for consideration by the Public, Technical Advisory Committee (TAC), Citizens Advisory Committee (CAC) and the TPO Board.

In a Transportation Management Area (TMA), the TPO selects all Title 23 and FTA-funded projects for implementation in consultation with the FDOT (except) projects on the National Highway System and projects funded under the bridge and interstate maintenance programs which are selected by the Department in cooperation with the TPO. Federal Lands Highway program projects are selected by the respective federal agency in cooperation with the TPO and the Department. The FDOT funds projects in the Work Program based on the priorities set by the TPO. You can view the latest TPO Procedure PR-07-02 for Project Priorities at the following link: Project Priorities and TIP Procedure

Project Priority Statement

On July 14, 2022, the TPO submitted its lists of prioritized transportation projects to FDOT for use in developing the new fifth year of the Five-Year Work Program, FY 2027/2028. These projects were prioritized by the TPO using the criteria shown below utilizing the State of the System ranking and TPO policy. There have been no significant changes in the TPO's project priorities from the previous TIP. The full List of Project Priorities was adopted on July 14, 2022 and is included in the TIP document.

Consistency with Other Plans

This TIP must be incorporated into the State Transportation Improvement Program (STIP) to ensure continued federal funding for the metropolitan area. The Secretary of the Department of Transportation cannot approve a TIP for inclusion in the STIP that does not come from a currently approved LRTP or a TIP that includes projects that have not been properly amended into the LRTP and approved by the TPO. All roadway capacity projects included in this TIP were drawn from the TPO's adopted 2045 LRTP and/or the previous 2040 LRTP. When possible, the TIP will cross-reference projects with the corresponding LRTP page number.

Additionally, projects selected for inclusion in the TIP are consistent with federal requirements and FDOT's Tentative Work Program, financially feasible for the appropriate funding category and reflect the TPO's priorities. All projects in the TIP are consistent (to the maximum extent feasible) with port, aviation and spaceport master plans, transit development plan and local government comprehensive plans, and are selected in part based on the public comment received under the TPO's Public Participation process.

Implemented Projects

The TPO publishes an annual listing of projects, produced by FDOT, for which federal funds have been obligated in the preceding year. This report is updated in early October each year. The most current data can be found at this link and is posted on the Space Coast TPO website. Annual Obligations Report - Space Coast TPO

Public Involvement

Annually, the TPO develops its TIP in accordance with all applicable state and federal laws governing public involvement. This includes 23 CFR 450.316 and 23 U.S.C. 134. The TPO shall develop and use a documented plan that defines a process for providing....federal land management agencies, public ports, private transportation providers (intercity bus operators, employer-based commuting programs, such as carpool program, vanpool program, transit benefit program, parking cash-out program, shuttle program, or telework program)...with reasonable opportunities to be involved in the planning process.

The TPO shall consult with agencies and officials responsible for other planning activities within the metropolitan planning area that are affected by transportation (including state and local planned growth, economic development, tourism, natural disaster risk reduction, environmental protection, airport operations, or freight movements) or coordinate its planning process (to the maximum extent practicable) with such planning activities.

Before adoption, the SCTPO posts the TIP on its website, at least 30 days in advance of the TPO Board Meeting, for public review and comment and presents the TIP at advertised public meetings to interested parties. "Interested parties" include citizens, affected public agencies including federal land management agencies, representatives of public transportation employees, freight shippers, providers of freight transportation services, representatives of users of public transportation, pedestrian walkways, bicycle transportation facilities, and representatives of the disabled. All public comments are recorded and included in the final TIP. This document states how each comment was addressed.

Other TIP public notice strategies include: input at local jurisdiction meetings on specific projects, Press Release announcement, SCTPO E-News Feature, social media posts, and in-person, written, or electronic comments at SCTPO Advisory Committee Meetings or at the SCTPO Governing Board Meeting. Additionally, a TIP Fact Sheet was developed in an effort to explain the purpose of the TIP.

Specific procedures for the use of public involvement in the annual development of the TIP have been clearly defined in the TPO's Public Participation Plan (PPP). The PPP is a blueprint for action to involve the public in transportation planning process. The SCTPO continuously seeks opportunities for every citizen to participate in the planning, reviewing, and implementing of its transportation projects and programs. The TPO's Public Participation Plan was last adopted by the TPO Board on December 8, 2022. To view the PPP use the following link: Public Participation Plan - Space Coast TPO

The TPO ensures Federal Lands are involved in the development of the Transportation Improvement Program including the US National Park, the Canaveral National Seashore, Merritt Island National Wildlife Refuge and NASA.

A 30-day comment period was initiated in May 2022 prior to the TIP being presented to the TPO Board for consideration in July. The draft TIP was presented at an advertised public meeting to interested parties on June 7, 2022 and posted on the TPO website and social media outlets for review and comment. An article soliciting input was also included in the TPO's electronic newsletter. The advertised public meeting was held virtually and 40+ citizen attendees attended. The meeting was also recorded and posted on the TPO's website and YouTube channel. All comments received were addressed, and revisions made, where appropriate.

Once approved, the TPO has an interactive web-based site which allows the public to utilize the information in a flexible, visual format. Visitors can generate either the entire TIP document, including maps, or a smaller custom designed document covering only those projects of particular interest. The document may also be viewed in its entirety or in summary form when downloaded from the TPO website at the following link: Interactive TIP Tool Hard copies are available, upon request, from the TPO staff office.

TIP Amendments

The TIP may be amended should there be a change in funding or project specifics. The amended version replaces the original document, with the amended date(s) noted on the front cover. The amended TIP also includes the resolution and attachment containing the specific project(s) that were amended into the TIP. The amended TIP is then posted to the TPO website. Provisions for TIP Amendments are in Procedure PR-07-01: Project Priorities and TIP Amendment Procedure

Certification Review

The Space Coast TPO participates in an annual joint-certification of its planning process with representatives from the Florida Department of Transportation District Five Office. The last annual Joint Certification with FDOT representatives occurred in February 1, 2022. Approximately every four years the TPO is certified in a more-lengthy certification process conducted by representatives from the Federal Highway Administration (FHWA), Federal Transit Administration (FTA), and FDOT. The last federal certification of this type was successfully completed on May 3, 2022.

Major Projects

Fully Funded

Major projects carried over from the last TIP that were fully funded and will be implemented within this TIP timeframe include:

- NASA Causeway Bridge Replacement and Space Commerce Way widening.
- US 192 Intersection with Hollywood/Evans.
- SR A1A multimodal improvements / median

Deletions / Delays

One project was deleted last TIP cycle as result of loss of revenue from the transportation trust fund due to the pandemic and the growing impact of electric and alternatively fueled vehicles. As of April 2022, the Space Coast Trail is fully funded.

• Space Coast Trail – Construction funds added back in work program and TIP in FY 2026

Beyond the TIP Timeframe

Major projects on the Strategic Intermodal System that extend beyond the timeframe of the TIP that will be implemented with reasonably anticipated revenue include:

- SR 528 Widening from Industry to SR 3 Construction is projected in FY 2031 \$434 million
- SR 528 Widening from SR 3 to SR 401 (Port) Construction is projected in FY 2031 \$439 million
- SR 401 Port Canaveral Bridge Replacement PD&E underway, Design FY 2027 \$2 million

Transportation Disadvantaged (TD)

Services for people who are transportation disadvantaged, located in Section F of this TIP, are developed pursuant to Subsection 427.015(1), Florida Statutes, and Rule 41-2 of the Florida Administrative Code. A description of each program and project, its planned costs and anticipated revenues, and the year the program or project is to be undertaken are included in Section F, Transit and Transportation Disadvantaged Projects. Through Federal, State and Brevard County Board of County Commissioner funding, people who qualify for either the Florida's Transportation Disadvantaged program or the Federal ADA are eligible to receive specialized transportation services.

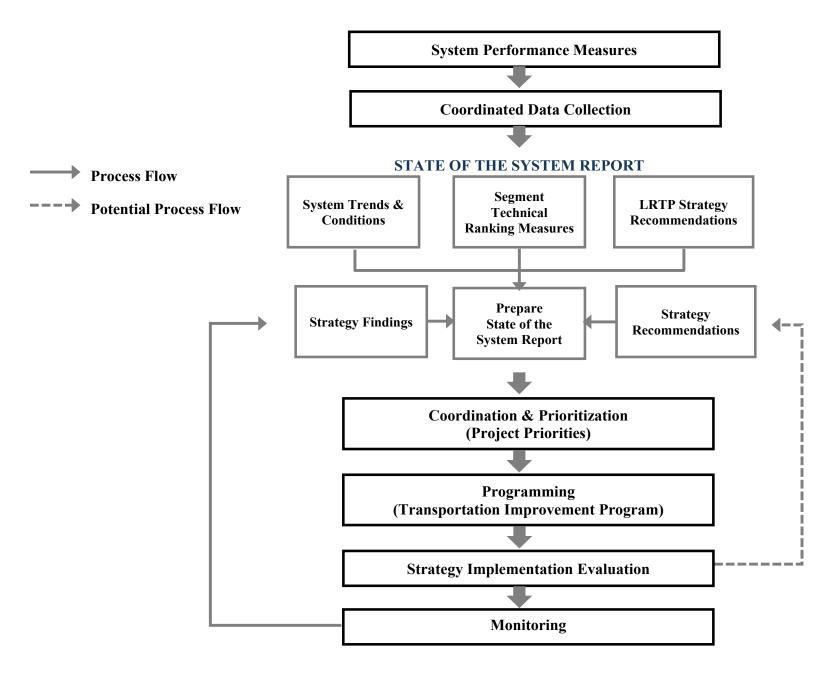

Congestion Management System

Transportation Management Areas (urbanized areas with populations over 200,000) are required by 23 USC 134 (k)(3) to have a Congestion Management Process that provides for the effective management and operation of new and existing facilities through the use of travel demand reduction and operational management strategies. The State of the System (SOS) report is a key component of the TPO's Congestion Management System (CMS). The CMS provides a framework for arriving at decisions for future transportation investments based on:

- Monitoring mobility conditions in the TPO planning area
- Evaluating the effectiveness of implemented strategies
- Identifying areas and segments that have the highest level of need based on current conditions
- Identifying appropriate strategies for roadways or intersections where congestion occurs

The TPO evaluates the state of its transportation system each year. This information is documented in the annual State of the System (SOS) report which covers a synthesis of current conditions and trends of the County's multi-modal transportation facilities. The TPO uses the SOS to understand if current transportation programs and priorities are effective at targeting facilities that need attention and if these are aligned with the goals and objectives of the organization. Priority corridor segments resulting from the SOS Report are considered top candidates for action within the TPO's funding availability. Action steps can range from conducting more detailed evaluations of corridors to implementing capital and operational changes. Future editions of the SOS will begin to look at expanded measures of effectiveness and a revised methodology to incorporate safety, livability, and multi-modal considerations in the ranking of transportation facility priorities. On the next page is a diagram of the TPO's Congestion Management Process.

Congestion Management Process

Performance Management

Adopted: July 14, 2022

Amended: February 7, 2023

1 - PUPOSE AND BACKGROUND OF PLANNING REQUIREMENTS

The new planning requirements are performance-driven, outcome-based approach to planning: CFR 450.306(a) The TPO, in cooperation with the State and public transportation operators, shall develop Long Range Transportation Plans and Transportation Improvement Programs through a performance-driven, outcome-based approach to planning for metropolitan areas of the State. All Space Coast TPO Performance Management Resolutions and materials can be found on our website.

Infrastructure Investment and Jobs Act (IIJA) Compliance and Federal Planning Factors

The (TIP) is authorized through the federal Infrastructure Investment and Jobs Act (IIJA) legislation signed into law November 16, 2021. This law provides long-term funding certainty for surface transportation that mostly maintains current program structures. The planning process will address the following factors: CFR 450.306(b) The metropolitan transportation planning process shall be continuous, cooperative, and comprehensive, and provide for consideration and implementation of projects, strategies, and services that will address the following factors:

- 1. Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
- 2. Increase the safety of the transportation system for motorized and non-motorized users;
- 3. Increase the security of the transportation system for motorized and non-motorized users;
- 4. Increase the accessibility and mobility of people and for freight;
- 5. Protect and enhance the environment, promote energy conservation, improve quality of life, and promote consistency between transportation improvements and state and local planned growth and economic development patterns;
- 6. Enhance the integration and connectivity of the transportation system, across and between modes for people and freight;
- 7. Promote efficient system management and operation;

- 8. Emphasize the preservation of the existing transportation system;
- 9. Improve the resiliency and reliability of the transportation system and reduce or mitigate storm-water impacts on surface transportation; and
- 10. Enhance travel and tourism

Performance Management is a strategic approach to connect investment and policy decisions to help achieve performance goals. Performance measures are quantitative criteria used to evaluate progress. Performance measure targets are the benchmarks against which collected data is gauged. The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires State DOTs and TPOs to conduct performance-based planning by tracking performance measures and setting data-driven targets to improve those measures. Performance-based planning ensures the most efficient investment of federal transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on key outcomes related to <u>seven national goals:</u>

- Improving Safety;
- Maintaining Infrastructure Condition;
- Reducing Traffic Congestion;
- Improving the Efficiency of the System and Freight Movement;
- Protecting the Environment; and,
- Reducing Delays in Project Delivery

The Fixing America's Surface Transportation (FAST) Act supplements the MAP 21 legislation by establishing timelines for State DOTs and TPOs to comply with the requirements of MAP-21. State DOTs are required to establish statewide targets and TPOs have the option to support the statewide targets or adopt their own. The Florida Department of Transportation (FDOT) and MPOs must coordinate when selecting PM1, PM2, and PM3 performance targets, and public transportation providers must coordinate with states and MPOs in the selection of state and MPO transit asset management and transit safety performance targets. FDOT and the MPOAC developed the TPM Consensus Planning Document to describe the processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management and target setting.

2 - HIGHWAY SAFETY MEASURES (PM1)

Safety is the first national goal identified in the FAST Act. In March of 2016, the Highway Safety Improvement Program (HSIP) and Safety Performance Management Measures Rule (PM1 Rule) was finalized and published in the federal register. The rule requires state DOTs and MPOs to annually establish targets and report performance and progress toward targets to FHWA for the following safety-related performance measures:

- Number and Rate of Fatalities;
- Rate of Fatalities per 100M Vehicle Miles Traveled (VMT);
- Number of Serious Injuries;
- Rate of Serious Injuries per 100M VMT; and
- Number of Non-Motorized Fatalities and Serious Injuries.

2.1 Highway Safety Targets

2.1.1 Statewide Targets

Safety performance measure targets are required to be adopted on an annual basis. In August of each calendar year, FDOT reports targets to FHWA for the following calendar year. On August 31, 2021, FDOT established statewide safety performance targets for calendar year 2022. Table 2.1 presents FDOT's statewide targets.

Table 2.1 Statewide Highway Safety Performance Targets

Performance Measure	Calendar Year 2022 Statewide Target
Number of fatalities	0
Rate of fatalities per 100 million vehicle miles traveled (VMT)	0
Number of serious Injuries	0
Rate of serious injures per 100 million vehicle miles traveled (VMT)	0
Number of non-motorized fatalities and serious injuries	0

FDOT adopted a vision of zero traffic-related fatalities in 2012. This, in effect, became FDOT's target for zero traffic fatalities and quantified the policy set by Florida's Legislature 35 years ago (Section 334.046(2), Florida Statutes, emphasis added):

"The mission of the Department of Transportation shall be to provide a <u>safe</u> statewide transportation system..."

FDOT and Florida's traffic safety partners are committed to eliminating fatalities and serious injuries. As stated in the Safe System approach promoted by the Federal Highway Administration, the death or serious injury of any person is unacceptable. The Florida Transportation Plan (FTP), the state's long-range transportation plan, identifies eliminating transportation related fatalities and serious injuries as the state's highest transportation priority. Therefore, FDOT established 0 as the only acceptable target for all five federal safety performance measures.

2.1.2 MPO Safety Targets

MPOs are required to establish safety targets annually within 180 days of when FDOT established targets. MPOs establish targets by either agreeing to program projects that will support the statewide targets or establish their own quantitative targets for the MPO planning area.

The Space Coast TPO, along with FDOT and other traffic safety partners, shares a high concern about the upward trending of traffic fatalities, both statewide and nationally. As such, on February 9, 2023, the Space Coast TPO agreed to support FDOT's statewide safety performance targets for calendar year 2023, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets.

2.2 Safety Trends in the MPO Area

After FDOT set its Safety Performance Measures targets in 2018, both FDOT and the Space Coast TPO established 2018 Baseline Safety Performance Measures. To evaluate baseline Safety Performance Measures, the most recent five-year rolling average (2017-2021) of crash data and VMT were utilized. Table 2-2 presents the Baseline Safety Performance Measures for Florida and the Space Coast TPO.

Table 2-2 Baseline Safety Performance Measures

Performance Measure	Florida 2016-2020	Space Coast TPO 2017-2021		
Number of fatalities	3,188	87.6		
Number of Serious Injuries	18,979	492.4		
Fatality rate per 100 million VMT	1.462	1.3		
Serious Injury Rate per 100 million VMT	8.694	7.2		
Total Number of non-motorized Fatalities and non- motorized serious injuries	3,189	84.4		
Source: FDOT 2020 State Highway Safety Report				

2.3 FDOT Safety Planning and Programming

2.3.1 Florida's Strategic Highway Safety Plan

Florida's Strategic Highway Safety Plan (SHSP), published in March 2021, specifically embraces Vision Zero and a new slogan and logo of Target Zero and identifies strategies to achieve zero traffic deaths and serious injuries. The SHSP was updated in coordination with Florida's 27 MPOs and the MPOAC, as well as other statewide traffic safety partners. The SHSP development process included review of safety-related goals, objectives, and strategies in MPO plans. The SHSP guides FDOT, MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out throughout the state.

Florida's transportation safety partners have focused on reducing fatalities and serious injuries through the 4E's of engineering, education, enforcement, and emergency response. To achieve zero, FDOT and other safety partners will expand beyond addressing specific hazards and influencing individual behavior to reshaping transportation systems and communities to create a safer environment for all travel. The updated SHSP calls on Florida to think more broadly and inclusively by addressing four additional topics, which could be referred to as the 4Is: information intelligence, innovation, insight into communities, and investments and policies. The SHSP also embraces an integrated "Safe System" approach that involves designing and managing road infrastructure to keep the risk of a mistake low and to ensure that when a mistake leads to a crash, the impact on the human body does not result in a fatality or serious injury. The five Safe System elements together create a holistic

approach with layers of protection: safe road users, safe vehicles, safe speeds, safe roads, and pos-crash care.

The SHSP also expands the list of emphasis areas for Florida's safety programs to include six, evolving emphasis areas, which are high-risk or high-impact crashes that are a subset of an existing emphasis area or emerging risks and new innovations, where safety implications are unknown. These evolving emphasis areas include work zones, drowsy and ill driving, rail grade crossings, roadway transit, micromobility, and connected and automated vehicles.

2.3.2 Florida's Highway Safety Improvement Program

While the Florida Transportation Plan and the SHSP both highlight the statewide commitment to a vision of zero deaths, the Florida Highway Safety Improvement Program (HSIP) Annual Report documents statewide performance and progress toward that vision. It also lists all HSIP projects that were obligated during the reporting year and the relationship of each project to the SHSP.

As discussed above, in the 2021 HSIP Annual report, FDOT reported 2022 statewide safety performance targets at "0" for each safety performance measure to reflect the vision of zero deaths. Annually, FHWA determines whether Florida has met the targets or performed better than baseline for at least four of the five measures. If this does not occur FDOT must submit an annual implementation plan with actions it will take to meet targets in the future.

On March 25, 2021, FHWA reported the results of its 2019 safety target assessment. FHWA concluded that Florida had not met or made significant progress toward its 2019 safety targets, noting that zero had not been achieved for any measure and that only three out of the five measures (number of serious injuries, serious injury rate, and number of non-motorized fatalities and serious injuries) were better than baseline. Subsequently, FDOT developed an <u>HSIP Implementation Plan</u> to highlight additional strategies it will undertake in support of the safety targets. This plan was submitted with the HSIP Annual Report to FHWA on August 31, 2021.

Consistent with FHWA requirements, the HSIP Implementation Plan focuses specifically on implementation of the HSIP as a core federal-aid highway program and documents the continued enhancements planned for Florida's HSIP to better leverage the benefits of this program. However, recognizing that FDOT already allocates all HSIP funding to safety programs - and building on the integrated approach that underscores FDOT's safety programs – the HSIP Implementation Plan also documents how additional FDOT and partner activities may contribute to progress toward zero. Key commitments in the HSIP Implementation Plan include:

- Fully implement Florida's SHSP, including the existing and evolving emphasis areas and the expanded list of strategies consistent with the Safe System approach.
- Advance safety priorities from the Department's Vital Few Safety initiative, which is focusing FDOT leadership and staff on solutions to three primary safety emphasis areas: roadway departures, intersections, and pedestrians and bicyclists. These are the top three factors associated with fatalities statewide during the 2015-2019 period.
- Enhance the HSIP funding and allocation processes to ensure Florida's safety challenges are evaluated from both a statewide perspective and a regional and local perspective. FDOT is applying new data and analysis tools to support better priority setting and decision making in the HSIP process.
- Continue to enhance coordination through FDOT's District Offices to MPOs, local governments, community traffic safety teams, and other partners to ensure HSIP and other safety-related investments are focused on the greatest need and greater opportunity for benefit, including the nearly 40 percent of fatalities that occur off the State Highway System.

Florida conducts extensive safety data analysis to understand the state's traffic safety challenges and identify and implement successful safety solutions. Florida's transportation system is evaluated using location-specific analyses that evaluate locations where the number of crashes or crash rates are the highest and where fatalities and serious injuries are most prominent. These analyses are paired with additional systemic analyses to identify characteristics that contribute to certain crash types and prioritize countermeasures that can be deployed across the system as a whole. As countermeasures are implemented, Florida also employs predictive analyses to evaluate the performance of roadways (i.e., evaluating results of implemented crash modification factors against projected crash reduction factors).

FDOT's State Safety Office works closely with FDOT Districts and regional and local traffic safety partners to develop the annual HSIP updates. Historic, risk-based, and predictive safety analyses are conducted to identify appropriate proven countermeasures to reduce fatalities and serious injuries associated with Florida's SHSP emphasis areas, resulting in a list of projects that reflect the greatest needs and are anticipated to achieve the highest benefit. While these projects and the associated policies and standards may take years to be implemented, they are built on proven countermeasures for improving safety and addressing serious crash risks or safety problems identified through a data-driven process. Florida continues to allocate all available HSIP funding to safety projects. FDOT's HSIP Guidelines provide detailed information on this data-driven process and funding eligibility.

Florida received an allocation of approximately \$177 million in HSIP funds for use during the 2020 state fiscal year from July 1, 2020 through June 30, 2021, and fully allocated those funds to safety projects. FDOT used these HSIP funds to complete projects that address intersections, lane departure, pedestrian and bicyclist safety, and other programs representing

the remaining SHSP emphasis areas. This year's HSIP allocated \$131 million in infrastructure investments on statemaintained roadways and \$33 million in infrastructure investments on local roadways. The remaining \$9 million included supporting activities such as transportation safety planning, preliminary engineering, traffic engineering studies, transportation statistics, and public information or education. A list of HSIP projects can be found in the HSIP 2020 Annual Report.

Beginning in fiscal year 2024, HSIP funding will be distributed among FDOT Districts based on statutory formula to allow the Districts to have more clearly defined funding levels for which they can better plan to select and fund projects. MPOs and local agencies coordinate with FDOT Districts to identify and implement effective highway safety improvement projects on non-state roadways.

2.3.3 Additional FDOT Safety Planning Activities

In addition to HSIP, safety is considered as a factor in FDOT planning and priority setting for projects in preservation and capacity programs. Data is analyzed for each potential project, using traffic safety data and traffic demand modeling, among other data. The <u>Florida PD&E Manual</u> requires the consideration of safety when preparing a proposed project's purpose and need, and defines several factors related to safety, including crash modification factor and safety performance factor, as part of the analysis of alternatives. Florida design and construction standards include safety criteria and countermeasures, which are incorporated in every construction project. FDOT also recognizes the importance of the American Association of State Highway Transportation Official (AASHTO) Highway Safety Manual (HSM). Through dedicated and consistent training and messaging over the last several years, the HSM is now an integral part of project development and design.

FDOT holds Program Planning Workshops annually to determine the level of funding to be allocated over the next 5 to 10 years to preserve and provide for a safe transportation system. Certain funding types are further analyzed and prioritized by FDOT Central Offices, after projects are prioritized collaboratively by the MPOs, local governments, and FDOT Districts; for example, the Safety Office is responsible for the HSIP and Highway Safety Program (HSP) and the Systems Implementation Office is responsible for the Strategic Intermodal System (SIS). Both the Safety and SIS programs consider the reduction of traffic fatalities and serious injuries in their criteria for ranking projects.

2.4 Safety Investments in the TIP

The Space Coast TPO has had a longstanding commitment to improving transportation safety, which is demonstrated through planning and programing activities. The Space Coast TPO 2045 LRTP emphasizes the commitment to safety through the goals identified in the plan. Improving the safety of the transportation system in Brevard County is an integral piece of the

transportation planning puzzle, one that plays a major role in any and all infrastructure improvements, across modes and across improvement types.

Activities included in the Unified Planning Work Program such as activities for the Vision Zero Action Plan and Leadership Team, additional school routes analysis, continued health and safety partnerships, participation on the Community Traffic Safety Team and helmet distribution programs. The TPO's Transportation Safety Education Program is very robust with UPWP activities that include:

- o Bicycle education program within schools; include maintenance of trailers (budgeted under task 1.0) used to house bicycles and rodeo equipment used in the program;
- o Education of pedestrian safety through state Head Start program
- o Outreach to law enforcement; libraries; millennials; seniors and those underserved in community
- o Coordinate, support and participate in National Walk Your Child to School Day and National Bike to School Day;
- Helmet distribution program
- o Crosswalk safety, all age groups, education to drivers and pedestrians
- O Development of targeted education outreach programs that focus on specific transportation emphasis programs such as resiliency, safety (Vision Zero) and technology/innovation techniques (some programs may use consulting services)

The education element of the TPO's safety activities are a crucial part of advancing safety for users of multimodal and roadway infrastructure.

The TIP includes projects that fall into specific investment priorities established by the Space Coast TPO in the LRTP. Other This includes safety programs, plans and projects such as:

- **Bicycle and Pedestrian Mobility Plan** serves as the non-motorized transportation element of the 2045 LRTP. FDOT and TPO staff work together to evaluate bicycle and pedestrian improvements in conjunction with capacity and resurfacing projects. Bicycle and pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are federally funded Transportation Alternatives Program (TAP) or the state funded Shared Use Non-motorized (SUN) Trail Program.
- **Vision Zero Action Plan** The TPO will continue to implement our adopted Action Plan. Actionable strategies that consider engineering, enforcement, education, and emergency response will be identified for the TPO using a data- driven approach. As of July 2022, ten Brevard municipalities have adopted the goal of ZERO traffic related fatalities and serious injuries.

• State of the System Report – Annually evaluate the state of the transportation system in Brevard to look at current conditions and trends to determine if the programs and priorities are effective at targeting facilities needing attention and if these programs are aligned with the seven different performance measures identified in the Long Range Transportation Plan. This is an integral part of the TPO's project priority and congestion management process.

The Space Coast TPO's TIP 2023 to 2027 includes various infrastructure projects improving safety conditions county- wide.

- Clearlake Road from SR 520 to 528 bicycle and pedestrian safety improvements within a resurfacing.
- Lighting projects
- SR 520 Corridor Access Management at high crash locations
- SR 520 bifurcated Cocoa Village downtown area Complete Street landscaping, removal of continuous right turn lane, pedestrian lighting, high emphasis crosswalks
- SR A1A multi-modal reconstruction to include medians and wider sidewalks in Cape Canaveral.
- SR A1A mid-block crossings with rectangular rapid flashing beacons recently installed in-road lighting and audible pedestrian signals.
- SR 3 at Mustang Way Intersection (statewide high pedestrian crash locations) elimination of slip lane and pedestrian improvements.
- Brevard Transportation Management Center is fully funded in FY 2024 for the dynamic Intelligent Transportation System Program
- ITS Communication projects, upgrades to signal box controllers, autonomous vehicle / beachline connected vehicle pilot deployment.
- Safe Routes to School projects
- Signing and pavement markings
- Eau Gallie / SR A1A Pedestrian Lighting / Free flow right turn lane removals.

The TIP includes specific investment priorities that support all of the Space Coast TPO's goals including safety, using a prioritization and project selection process established in the LRTP. This process evaluates projects that have an anticipated effect of reducing both fatal and injury crashes. The TPO's goal of reducing fatal and serious injury crashes is linked to this investment plan and the process used in prioritizing the projects is consistent with federal requirements. The Space Coast TPO

will continue to coordinate with FDOT and transit providers to act on the additional targets and other requirements of the federal performance management process. Because safety is inherent in so many FDOT and Space Coast TPO programs and projects, and because of the broad and holistic approach FDOT is undertaking with its commitment to Vision Zero, the program of projects in this TIP is anticipated to support progress towards achieving the safety targets.

3 - PAVEMENT AND BRIDGE CONDITION MEASURES (PM2)

FHWA's Pavement and Bridge Condition Performance Measures Final Rule, which is also referred to as the PM2 rule, establishes the following six performance measures.

- 1. Percent of Interstate pavements in good condition;
- 2. Percent of Interstate pavements in poor condition;
- 3. Percent of non-Interstate National Highway System (NHS) pavements in good condition;
- 4. Percent of non-Interstate National Highway System (NHS) pavements in poor condition;
- 5. Percent of NHS bridges by deck area classified as in good condition; and
- 6. Percent of NHS bridges by deck area classified as in poor condition.

For the pavement measures, five pavement metrics are used to assess condition:

- International Roughness Index (IRI) an indicator of roughness; applicable to all asphalt, jointed concrete, and continuous concrete pavements;
- Cracking percent percentage of the pavement surface exhibiting cracking; applicable to all asphalt and concrete pavements;
- Rutting extent of surface depressions; applicable to asphalt pavements;
- Faulting vertical misalignment of pavement joints; applicable to certain types of concrete pavements; and
- Present Serviceability Rating (PSR) a quality rating applicable only to NHS roads with posted speed limits of less than 40 miles per hour.

For each pavement metric, a threshold is used to establish good, fair, or poor condition. Using these metrics and thresholds, pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the

non-Interstate NHS. Asphalt pavement is assessed using the IRI, cracking, and rutting metrics, while jointed concrete is assessed using IRI, cracking, and faulting. For these two pavement types, a pavement section is rated good if the ratings for all three metrics are good, and poor if the ratings for two or more metrics are poor.

Continuous concrete pavement is assessed using the IRI and cracking metrics. For this pavement type, a pavement section is rated good if both metrics are rated good, and poor if both metrics are rated poor.

If a state collects and reports PSR for any applicable segments, those segments are rated according to the PSR scale. For all three pavement types, sections that are not good or poor are rated fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

The bridge condition measures refer to the percentage of bridges by deck area on the NHS that are in good condition or poor condition. The measures assess the condition of four bridge components: deck, superstructure, substructure, and culverts. Each component has a metric rating threshold to establish good, fair, or poor condition. Each bridge on the NHS is evaluated using these ratings. If the lowest rating of the four metrics is greater than or equal to seven, the structure is classified as good. If the lowest rating is less than or equal to four, the structure is classified as poor. If the lowest rating is five or six, it is classified as fair.

The bridge measures are expressed as the percent of NHS bridges in good or poor condition. The percent is determined by summing the total deck area of good or poor NHS bridges and dividing by the total deck area of the bridges carrying the NHS. Deck area is computed using structure length and either deck width or approach roadway width.

A bridge in good condition suggests that no major investment is needed. A bridge in poor condition is safe to drive on; however, it is nearing a point where substantial reconstruction or replacement is needed.

3.1 Pavement and Bridge Condition Targets

3.1.1 Statewide Targets

Federal rules require state DOTs to establish two-year and four-year targets for the pavement and bridge condition measures. On May 18, 2018, FDOT established statewide pavement and bridge targets for the first performance period ending in 2021. The two-year targets represent pavement and bridge condition at the end of calendar year 2020, while the four-year targets represent condition at the end of 2025. Table 3.1 presents the statewide targets.

Table 3.1. Statewide Pavement and Bridge Condition Performance Targets

Performance Measure	2023 Statewide Target	2025 Statewide Target
Percent of Interstate pavements in good condition	≥60%	≥60%
Percent of Interstate pavements in poor condition	≤5%	≤5%
Percent of non-Interstate NHS pavements in good condition	≥40%	≥40%
Percent of non-Interstate NHS pavements in poor condition	≤5%	≤5%
Percent of NHS bridges (by deck area) in good condition	≥50%	≥50%
Percent of NHS bridges (by deck area) in poor condition	≤10%	≤10%

For comparative purposes, the baseline (2021) conditions are as follows:

- 70.4 percent of the Interstate pavement is in good condition and 0.7 percent is in poor condition;
- 47.5 percent of the non-Interstate NHS pavement is in good condition and 1.1 percent is in poor condition; and
- 64.1 percent of NHS bridges (by deck area) are in good condition and 1.4 percent is in poor condition.

In determining its approach to establishing performance targets for the federal pavement and bridge condition performance measures, FDOT considered many factors. To begin with, FDOT is mandated by Florida Statute 334.046 to preserve the state's pavement and bridges to specific standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, MAP-21 requires FDOT to develop a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the state DOT targets for asset condition and performance of the NHS. FDOT's TAMP was updated to reflect MAP-21 requirements in 2018 and the final TAMP was approved on June 28, 2019. The TAMP will be updated in 2022.

Further, the federal pavement condition measures require a new methodology that is a departure from the methods currently used by FDOT and uses different ratings and pavement segment lengths. For bridge condition, the performance is measured in deck area under the federal measure, while the FDOT programs its bridge repair or replacement work on a bridge by bridge basis. As such, the federal measures are not directly comparable to the methods that are most familiar to FDOT.

FDOT collects and reports bridge and pavement data to FHWA each year to track performance and progress toward the targets. Reported pavement and bridge data for 2018 and 2019 show relatively stable conditions compared to the 2017 baseline and exceeded the established 2019 targets; 2020 data are being developed. In early 2021, FHWA determined that FDOT made significant progress toward the two-year targets.

3.1.2 MPO Targets

MPOs must set four-year targets for the six pavement and bridge condition measures within 180 days of when FDOT established targets. MPOs can either agree to program projects that will support the statewide targets or establish their own quantifiable targets for the MPO's planning area for one or more measures.

On October 11, 2018, the Space Coast TPO agreed to support FDOTs statewide pavement and bridge performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets.

3.2 Pavement and Bridge Investments in the TIP

The Space Coast TPO's TIP reflects investment priorities established in the 2045 LRTP. The TIP devotes a significant amount of resources to projects that will maintain pavement and bridge condition performance. Investments in pavement and bridge condition include pavement replacement and reconstruction, bridge replacement and rehabilitation, and new bridge and pavement capacity. The TIP will fund \$ 362.1 million for pavement and bridge rehabilitation, and \$146 million for a new bridge replacement for the NASA Causeway/ Indian River.

The projects included in the TIP are consistent with FDOT's Five Year Work Program, and therefore to FDOT's approach to prioritize funding to ensure the transportation system is adequately preserved and maintained. Per federal planning requirements, the state selects projects on the NHS in cooperation with the TPO from the approved TIP. Given the significant resources devoted in the TIP to pavement and bridge projects, the TPO anticipates that once implemented, the TIP will contribute to progress towards achieving the statewide pavement and bridge condition performance targets.

4 - SYSTEM PERFORMANCE, FREIGHT, CONGESTION MITIGATION & AIR QUALITY IMPROVEMENT (CMAQ) PROGRAM MEASURES (PM3)

USDOT's System Performance/Freight/CMAQ Performance Measures Final Rule established measures to assess passenger and freight performance on the Interstate and non-Interstate National Highway System (NHS), and traffic congestion and on-road mobile source emissions in areas that do not meet federal National Ambient Air Quality Standards (NAAQS). The rule, which is referred to as the PM3 rule, requires state DOTs and MPOs to establish targets for the following six performance measures:

National Highway Performance Program (NHPP)

- 1. Percent of person-miles on the Interstate system that are reliable, also referred to as Level of Travel Time Reliability (LOTTR);
- 2. Percent of person-miles on the non-Interstate NHS that are reliable (LOTTR);

National Highway Freight Program (NHFP)

3. Truck Travel Time Reliability index (TTTR);

Congestion Mitigation and Air Quality Improvement Program (CMAQ)

- 4. Annual hours of peak hour excessive delay per capita (PHED);
- 5. Percent of non-single occupant vehicle travel (Non-SOV); and
- 6. Cumulative 2-year and 4-year reduction of on-road mobile source emissions (NOx, VOC, CO, PM10, and PM2.5) for CMAQ funded projects.

Because all areas in Florida meet current NAAQS, the last three listed measures above pertaining to the CMAQ Program do not currently apply in Florida. A description of the applicable measures follows.

LOTTR Measures

The LOTTR performance measures assesses the percent of person-miles traveled on the Interstate or the non-Interstate NHS that are reliable. LOTTR is defined as the ratio of longer travel times (80th percentile) to a normal travel time (50th percentile) over of all applicable roads, between the hours of 6 a.m. and 8 p.m. each day. The measure is expressed as the percent of person-miles traveled on the Interstate or Non-Interstate NHS system that are reliable. Person-miles consider the number of people traveling in buses, cars, and trucks over these roadway segments.

TTTR Measure

The TTTR performance measure assesses the reliability index for trucks traveling on the interstate. A TTTR ratio is generated by dividing the 95th percentile truck travel time by a normal travel time (50th percentile) for each segment of the Interstate system over specific time periods throughout weekdays and weekends. This is averaged across the length of all Interstate segments in the state or TPO planning area to determine the TTTR index.

4.1 System Performance and Freight Targets

4.1.1. Statewide Targets

Federal rules require state DOTs to establish four-year targets for the system performance and freight targets. On May 18, 2018, FDOT established statewide performance targets for the first performance period ending 2021. The two-year targets represent performance at the end of calendar year 2023, while the four-year targets represent performance at the end of 2025. Table 4.1 presents the statewide targets.

Table 4.1 Statewide System Performance and Freight Targets

Performance Measure	2023 Statewide Target	2025 Statewide Target
Percent of person-miles on the Interstate system that are reliable (Interstate LOTTR)	≥75%	≥70%
Percent of person-miles on the non- Interstate NHS that are reliable (Non- Interstate NHS LOTTR	≥50%	≥50%
Truck travel time reliability (TTTR)	≤1.75	≤2.00

For comparative purposes, current statewide conditions are as follows:

- 87.5 percent of person-miles traveled on the Interstate are reliable;
- 92.9 percent of person-miles traveled on the non-Interstate are reliable; and
- 1.38 truck travel time reliability index.

In establishing these targets, FDOT reviewed external and internal factors that may affect reliability; analyzed travel time data from the National Performance Management Research Dataset (NPMRDS) for the years 2014 to 2017, and developed a sensitivity analysis indicating the level of risk for road segments to become unreliable.

The federal travel time reliability measures follow a new methodology that differs from prior Florida efforts. In addition, beginning in 2017, the NPMRDS expanded its coverage of travel segments, and a new vendor began to supply the dataset, creating a difference in reliability performance results on non-Interstate NHS segments between pre-2017 trends and later trends. These factors create challenges for establishing a confident trend line to inform target setting for the next two to four years.

In consideration of these differences, as well as other unknowns and unfamiliarity associated with the new required processes, FDOT took a conservative approach when establishing its initial statewide system performance and freight targets.

FDOT collects and reports reliability data to FHWA each year to track performance and progress toward the reliability targets. During 2018 and 2019, the percentage of person-miles that are reliable improved over the 2017 baseline on both the Interstate and non-Interstate NHS. The truck travel time reliability index improved slightly from the 2017 baseline to 2018 but declined slightly in 2019. Actual performance in 2019 was better than the 2019 targets, and in early 2021 FHWA determined that FDOT made significant progress toward the 2019 targets. Performance improved for all measures in 2020. Final data for 2021 are under development.

System performance and freight are addressed through several statewide initiatives:

• Florida's Strategic Intermodal System (SIS) is composed of transportation facilities of statewide and interregional significance. The SIS is a primary focus of FDOT's capacity investments and is Florida's primary network for ensuring a strong link between transportation and economic competitiveness. These facilities, which span all modes and include highways, are the workhorses of Florida's transportation system and account for a dominant share of the people and freight movement to, from and within Florida. The SIS includes 92 percent of NHS lane miles in the state. Thus, FDOT's focus on improving performance of the SIS goes hand-in-hand with improving the NHS, which is the focus of the FHWA's TPM program. The development of the SIS Five-Year Plan by FDOT considers scores on a range of measures including mobility, safety, preservation, and economic competitiveness as part of FDOT's Strategic Investment

Tool (SIT).

- In addition, FDOT's Freight Mobility and Trade Plan (FMTP) define policies and investments that will enhance Florida's economic development efforts into the future. The FMTP's identifies truck bottlenecks and other freight investment needs and defines the process for setting priorities among these needs to receive funding from the National Highway Freight Program (NHFP). Project evaluation criteria tie back to the FMTP objectives to ensure high priority projects support the statewide freight vision. In February 2019, FHWA approved the FMTP as FDOT's State Freight Plan. FDOT updated the plan in spring 2020.
- FDOT also developed and refined a methodology to identify freight bottlenecks on Florida's SIS on an annual basis using vehicle probe data and travel time reliability measures. Identification of bottlenecks and estimation of their delay impact aids FDOT in focusing on relief efforts and ranking them by priority. In turn, this information is incorporated into FDOT's SIT to help identify the most important SIS capacity projects to relieve congestion.

4.1.2 MPO Targets

MPOs must establish four-year targets for all three measures. MPOs can either agree to program projects that will support the statewide targets, or establish their own quantifiable targets for the MPO's planning area for one or more measures.

On October 11, 2018 the Space Coast TPO agreed to support FDOT's statewide system performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets.

4.2 System Performance and Freight Investments in the TIP

The Space Coast TPO's TIP reflects investment priorities established in the 2045 LRTP. The focus of Space Coast TPO's investments that address system performance and freight are identified below. The TIP will fund \$201 million for congestion relief projects and freight, \$12.2 million for TSM&O projects.

- Intersection improvements (on NHS roads) US 192 / Hollywood
- Freight improvements (SIS) to increase capacity on SR 528 (Beachline) and roadway rehabilitation to SR 528 and I-95.
- Ellis Road widening (SIS) to Orlando-Melbourne International Airport.
- Space Freight (SIS hubs and connectors) replacement of NASA Cswy/Indian River Bridge; SR 405

Spaceport Connector Intersection improvements; Space Commerce Way Widening

- Freight and Cargo SR 401 bascule bridges replacement critical to economic prosperity of central Florida regions corridor serves, Port Canaveral cruise passengers, Kennedy Space Center, Space Florida, Seaport Canaveral, port assets of the US Navy and US army and the Cape Canaveral Air force Station. The volume of freight and cargo movement is drivers that impact the performance and reliability of the bascule bridges.
- TSM&O / ITS projects The strategies to address these objectives include capital investments in the county's arterial and limited access roadways providing access to major economic generators like ports, downtown areas, and other emerging employment centers as well as incremental improvements in the county's Intelligent Transportation System through the TPO's ITS Master Plan.
- Projects evaluated in the State of the System / Congestion Management System and selected for the TIP.
- Investments in transit, bicycle, or pedestrian systems that promote mode shift.

Intermodal Hubs

- 1. Creation of a Regional Intermodal Connections Committee (RICC) to build a unified partnership in support of constructing a passenger rail station in Brevard County that accommodates modal choices that connect to local and regional communities and destinations. The TPO's committee is comprised of local stakeholders, such as community leaders, Brightline, FDOT and Space Coast Area Transit will meet from January - July in 2023 to discuss various rail initiatives.
- 2. Intermodal Passenger Rail Station Feasibility Study will commence in 2023 to determine intermodal project solutions to demonstrate increased access to intermodal or multimodal transportation facilities that are regionally significant and show cross-county connectivity.
- 3. Space Coast TPO boxed funds in FY 27 & FY 28 for future Intermodal Station development.

The projects included in the TIP are consistent with FDOT's Five Year Work Program, and therefore to FDOT's approach to prioritize funding to address performance goals and targets. Per federal planning requirements, the state selects projects on the NHS in cooperation with the TPO from the approved TIP. Given the significant resources devoted in the TIP to programs that address system performance and freight, the TPO anticipates that once implemented, the TIP will contribute to progress towards achieving the statewide reliability performance targets.

Page 42 of 213

<u>5 - TRANSIT ASSET MANAGEMENT MEASURES</u>

Transit Asset Performance Measures

FTA's Transit Asset Management (TAM) regulations apply to all recipients and subrecipients of Federal transit funding that own, operate, or manage public transportation capital assets. The regulations define the term "state of good repair," require that public transportation providers develop and implement TAM plans, and established state of good repair standards and performance measures for four asset categories: equipment, rolling stock, transit infrastructure, and facilities. Table 6.1 identifies the TAM performance measures.

The table below identifies performance measures outlined in the final rule for transit asset management.

Table 5.1 FTA TAM Performance Measures

Asset Category	Performance Measure
Equipment	Percentage of non-revenue, support-service and maintenance vehicles that have met or exceeded their Useful Life Benchmark
Rolling Stock	Percentage of revenue vehicles within a particular asset class that have either met or exceeded their Useful Life Benchmark
Infrastructure	Percentage of track segments with performance restrictions
Facilities	Percentage of facilities within an asset class rated below condition 3 on the TERM scale

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider's operating environment. ULB considers a provider's unique operating environment such as geography, service frequency, etc.

Public transportation agencies are required to establish and report TAM targets annually for the following fiscal year. Each public transit provider or its sponsors must share its targets with each MPO in which the transit provider's projects and services are programmed in the MPO's TIP. MPOs were required to establish initial TAM targets within 180 days of the date that public transportation providers established initial targets by October 1, 2018. However, MPOs are not required to establish TAM targets annually each time the transit provider establishes targets. Instead, subsequent MPO targets must be established when the MPO

updates the LRTP. When establishing TAM targets, the MPO can either agree to program projects that will support the transit provider targets or establish its own separate regional TAM targets for the MPO planning area. MPO targets may differ from agency targets, especially if there are multiple transit agencies in the MPO planning area. To the maximum extent practicable, transit providers, states, and MPOs must coordinate with each other in the selection of performance targets.

The TAM regulation defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service or more than 100 vehicles in all fixed route modes, or more than 100 vehicles in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes, or have 100 or less vehicles in one non-fixed route mode. A Tier I provider must establish its own TAM targets, as well as report performance and other data to FTA. A Tier II provider has the option to establish its own targets or to participate in a Group Plan with other Tier II providers whereby targets are established for the entire group in coordination with a group plan sponsor, typically a state DOT.

5.1 FDOT Group TAM Plan Participants

A total of 19 transit providers participated in the FDOT Group TAM Plan and continue to coordinate with FDOT on establishing and reporting group targets to FTA through the National Transit Database (NTD) (Table 6.2). These are FDOT's Section 5311 Rural Program subrecipients. The Group TAM Plan was adopted in October 2018 and covers fiscal years 2018-2019 through 2021-2022. Group TAM Plan targets for fiscal year 2021 were submitted to NTD in March 2021; updated targets for fiscal year 2022 are under development.

Table 5.2 Florida Group TAM Plan Participants

	District	Participating Transit Providers
1		Central Florida Regional Planning Council Hendry County

3		Big Bend Transit* Calhoun Transit Gulf County ARC JTRANS Liberty County Transit Tri-County Community Council Wakulla Transit
4		No participating providers
5		Flagler County Marion Transit Sumter Transit
6		Key West Transit
7		No participating providers *Provider service area covers portions of District 2 and 3

5.2 Transit Asset Management Targets

The Space Coast TPO has the following Tier II provider operating in the region: Space Coast Area Transit.

5.2.1 Transit Provider Targets

Table 5.3 Transit Asset Management Targets for Space Coast Area Transit

Asset Category - Performance Measure	Asset Class	SCAT Useful Life Benchmark	2022 Target
Rolling Stock			
	Bus (BU) Fixed Route (43 vehicles)	9-12 Years 350,000 – 650,000 Miles	13%
Age - % of revenue vehicles within a particular asset class that have met or exceeded their Useful Life Benchmark (ULB)	Cutaway Bus (CU) Paratransit (29 vehicles)	6-7 Years 160,000 – 175,000 Miles	28%
	Van (VN) Paratransit (7 vehicles)	4-5 Years 100,000 Miles	0%
	Agency Paratransit Vanpool Vans (39 vehicles)	4-7 Years 100,000 Miles	40%
	Commuter Vanpool Vans	4-6 Years 100,000 Miles	15%
Equipment			
Age - % of non-revenue vehicles within a particular asset class that have met or	Non-Revenue/Service Automobile	9 Years 125,000 Miles	0%
exceeded their Useful Life Benchmark (ULB)	Misc. Equipment	Under TERM 3.0	0%
Infrastructure			
% of track segments with performance restrictions	Rail fixed guideway track	N/A	N/A
		Page 46 of 212	

Asset Category - Performance Measure	Asset Class	SCAT Useful Life Benchmark	2022 Target
	Maintenance	Under TERM 3.0	0%
	Parking Structures	Under TERM 3.0	0%
Condition - % of facilities with a condition rating below 3.0 on the FTA Transit	Passenger Facilities	Under TERM 3.0	0%
Economic Requirements Model (TERM) Scale	Shelter	Under TERM 3.0	0%
Scale	Storage	Under TERM 3.0	0%
	Etc.	Under TERM 3.0	0%

5.2.2 MPO Transit Asset Management Targets

As discussed above, MPOs established TAM targets within 180 days of the date that public transportation providers established their first targets in 2018. MPOs are not required to establish TAM targets annually each time the transit provider establishes targets. Instead, MPO's must revisit targets each time the MPO updates the LRTP. MPOs can either agree to program projects that will support the transit provider targets or establish separate regional TAM targets for the MPO planning area. MPO targets may differ from agency targets, especially if there are multiple transit agencies in the MPO planning area.

On February 11, 2021, the Space Coast TPO agreed to support Space Coast Area Transit's asset targets, thus agreeing to plan and program projects in the TIP that will, once implemented, make progress toward achieving the transit provider targets.

5.3 Transit Asset Management Investments in the TIP

The Space Coast TPO TIP was developed and is managed in cooperation with Space Coast Area Transit. It reflects the investment priorities established in the 2045 LRTP. Key components of the plan development process included identifying anticipated Year 2045 system capacity, system needs, cost estimates for the identified needs, and the projection of financial resources and revenues anticipated to be available by the Year of Expenditure (YOE). The resulting 2045 Cost Feasible Plan reflects an array of projects and goods in a cost-efficient manner. Key projects within the Cost Feasible Plan (CFP) include a select number of critical highway expansion projects, such as additional lanes along major corridors, supported by an array of multimodal strategies to improve traffic and transit operations, including roadway connectivity, and pedestrian/bicycle route development. However, the CFP does not address any transit needs.

FTA funding, as programmed by the region's transit providers and FDOT, is used for programs and products to improve the condition of the region's transit assets. The focus of the Space Coast TPO's investments that address transit state of good repair include:

- Bus and other vehicle purchase and replacements
- Equipment purchases and replacements
- Retrofits
- Repair, rehabilitation, and replacement of transit facilities
- Repair, rehabilitation, and replacement of transit infrastructure

Transit asset condition and state of good repair is a consideration in the methodology Space Coast TPO uses to select projects for inclusion in the TIP. The TIP includes specific investment priorities that support all of the TPO's goals, including transit state of good repair, using a prioritization and project selection process established in the LRTP. This process evaluates projects that, once implemented, are anticipated to improve transit state of good repair in the MPO's planning area.

The Space Coast TPO's TIP has been evaluated and the anticipated effect of the overall program is that, once implemented, progress will be made towards achieving the transit asset performance targets. The Space Coast TPO will continue to coordinate with Space Coast Area Transit to maintain the region's transit assets in a state of good repair.

For more information on these programs and projects, see Transit and Transportation Disadvantaged Projects of TIP section that discusses transit projects and investments.

<u>6</u> - Transit Safety Performance

FTA's Public Transportation Agency Safety Plan (PTASP) regulations established transit safety performance management requirements for providers of public transportation systems that receive federal financial assistance under 49 U.S.C. Chapter 53.

The regulations apply to all operators of public transportation that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety

Oversight Program. The PTASP regulations do not apply to certain modes of transit service that are subject to the safety jurisdiction of another Federal agency, including passenger ferry operations regulated by the United States Coast Guard, and commuter rail operations that are regulated by the Federal Railroad Administration.

The PTASP must include performance targets for the performance measures established by FTA in the National Public Transportation Safety Plan, which was published on January 28, 2017. The transit safety performance measures are:

- Total number of reportable fatalities and rate per total vehicle revenue miles by mode.
- Total number of reportable injuries and rate per total vehicle revenue miles by mode.
- Total number of reportable safety events and rate per total vehicle revenue miles by mode.
- System reliability mean distance between major mechanical failures by mode.

In Florida, each Section 5307 or 5311 transit provider must develop a System Safety Program Plan (SSPP) under Chapter 14-90, Florida Administrative Code. FDOT technical guidance recommends that Florida's transit agencies revise their existing SSPPs to be compliant with the new FTA PTASP requirements.

Each provider of public transportation that is subject to the PTASP regulations must certify that its SSPP meets the requirements for a PTASP, including transit safety targets for the federally required measures. Providers were required to certify their initial PTASP and safety targets by July 20, 2021. Once the public transportation provider establishes safety targets it must make the targets available to MPOs to aid in the planning process. MPOs had 180 days after receipt of the PTASP targets to establish transit safety targets for the MPO planning area. MPOs are not required to establish transit safety targets annually each time the transit provider establishes targets. Instead, subsequent MPO targets must be established when the MPO updates the LRTP. When establishing transit safety targets, the MPO can either agree to program projects that will support the transit provider targets or establish its own separate regional transit safety targets for the MPO planning area. In addition, the Space Coast TPO must reflect those targets in LRTP and TIP updates.

6.1 Transit Safety Targets

Space Coast Area Transit operates in the Space Coast TPO planning area. Space Coast Area Transit is responsible for developing a PTASP and establishing transit safety performance targets annually.

Space Coast Area Transit established the following transit targets in Table 6.1. on February 11, 2021.

6.1.1 Transit Agency Safety Targets (SCAT approved Nov. 30, 2022)

TABLE 6.2. Transit Safety Performance Targets for Space Coast Area Transit

Years:		–19-F.Y. eline		20-F.Y. OVID		/21-F.Y. rget)/21-F.Y. ctual		./22 FY rget		' 22-F.Y. tual		/23 FY rget

6.2 MPO Transit Safety Targets and Investments in TIP

On February 9, 2023, the Space Coast TPO agreed to support Space Coast Area Transit's safety targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the targets.

The Space Coast TPO's TIP was developed and is managed in cooperation with Space Coast Area Transit. It reflects the investment priorities established in the TPO's 2045 LRTP. The goal and objective of the LRTP is to

enhance mobility and reliability of the Transportation System for Communities, Tourism and Commerce. An objective includes enhancing access to travel options in transportation disadvantaged area.

FTA funding, as programmed by the region's transit providers and FDOT, is used for programs and products to improve the safety of the region's transit systems. The focus of the Space Coast TPO's investments that address transit safety include: projects that improves access to transit facilities and provides improved bicycle and/or pedestrian facilities for transportation disadvantaged area (direct and indirect). One major goal is to improve safety and security of all users. A major project completed by the Space Coast TPO was the ADA Bus Stop Assessment Update. Upon completion of the study, the Space Coast Area Transit staff focused on short term, low cost improvements and were able to improve an additional 40 stops, bringing compliance up to 8 percent in just a couple of weeks.

Transit Safety is a consideration in the methodology Space Coast TPO uses to select projects for inclusion in the TIP. The TIP includes specific investment priorities that support all of the MPOs goals, including transit safety, using a prioritization and project selection process established in the LRTP. This process evaluates projects that, once implemented, are anticipated to improve transit safety in the MPOs planning area.

In 2022, the Space Coast TPO conducted a Transit Survey to support the update of the Transit Development Plan. The Space Coast TPO and Space Coast Area Transit are continuously working towards bringing bus stops up to compliance through meeting with municipalities and coordination with agencies such as the Merritt Island Redevelopment Agency. The Space Coast TPO will continue to coordinate to maintain and improve the safety of the region's transit system and maintain transit assets in a state of good repair. The TIP devotes resources to projects that will maintain and improve transit safety. Investments in transit safety in the TIP include \$23.6 million to improve transit safety and reliability.

RESOLUTION # 23-06

Transportation Improvement Program (TIP) Amendment

A RESOLUTION, approving the Space Coast Transportation Planning Organization's Fiscal Year 2022/23 to 2026/27 Transportation Improvement Program (TIP) Amendment for the Palm Bay-Melbourne and Titusville Urbanized Areas.

WHEREAS, the Space Coast Transportation Planning Organization is the designated and constituted body responsible for the urban transportation planning and programming process for the Palm Bay-Melbourne and Titusville Urbanized Areas; and

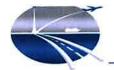

WHEREAS, Florida Statutes 339.175; 23 U.S.C. 134; and 49 U.S.C. 5303 require that the urbanized area, as a condition to the receipt of federal capital or operating assistance, have a continuing, cooperative and comprehensive transportation planning process that results in plans and programs consistent with the comprehensively planned development of the urbanized areas; and

WHEREAS, the Transportation Improvement Program (TIP) is hereby endorsed as an accurate representation of the areas priorities as developed through the planning process carried on cooperatively by the state and local communities in accordance with the provisions of 23 U.S.C. 134.; and

NOW THEREFORE, BE IT RESOLVED by the Space Coast Transportation Planning Organization to authorize amendments to the Transportation Improvement Program for Fiscal Year 2022/23 to 2026/27, as detailed in "Attachments A, B and C" which includes the roll forward projects and authorizes staff to submit the TIP to all appropriate individuals and agencies.

6/7/2022	Sarah Hodge	Email	hodge_sarah@yahoo.com	Dear SCTPO Members,	AH via email on 6/7/22: Good Afternoon Ms. Hodge, Thank you for submitting your comments and feedback regarding the proposed FDOT
				We are opposed to the Roundabout proposed go the City of Cape Canaveral!	safety enhancements and roundabout on A1A, in Cape Canaveral. Are you wanting this comment to be read aloud tonight for the Open House Public Comment Period?: If so, thank you for submitting your below public comment for the Open House. Your comment and the comments you list below that (from other citizens) will submitted as part of the Public Comment document for the Transportation Improvement
				We the residents of Cape Canaveral and Cocoa Beach travel the A1A corridor	Program.
				through Cape Canaveral on a regular basis are not convinced that installation of	
				a roundabout at the intersection of A1A and International Drive is in the best	Public involvement is vital to our process. We do value your input as residents of Cape Canaveral and Cocoa Beach. We understand your
				interests of the community, nor do we believe the roundabout plan rendering	concern and your desire for another alternative. You make some very keen observations and suggestions and we are continuing to work with
				provides the safest approach to change. We are imploring you to work with the Florida Department of Transportation and get them to offer alternative designs to	the City and Cape Canaveral to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. Your comments will be sent to the FDOT District Five project managers to include as part of the public comment record for review.
				a roundabout. The one in Viera has a high accident and death rate. We have	portestria real estrational via se service interestrictions projectivitations as paint of the positioned and real enterior.
				thousands of tourists, foreign visitors and cruise passengers that will travel this	If you know of any other community group that would benefit from a small group meeting to share concerns or to share more about this
				Roundabout area and are not familiar with them along with the local citizens, the	project, we recommend reaching out to:
				oil tankers, large semi trailers, large RV's, trucks with boats including the Super	
				Boats, Fire Engines, School Buses, etc. There will be accidents and death because of this Roundabout.	
				of this Roundabout.	• Lori.Trebitz@dot.state.fl.us
				We need the speed limits lowered and enforced. We need reasonable, logical	Thank you for your time.
				and practical improvements to improve safety of pedestrians, bicycles and drivers	
				without putting in a roundabout.	
				Please make this an immediate and priority action before this project is approved!	
				The citizens will continue to fight this even if the FDOT approves it. Roundabouts	
				have been removed after being built. Remember the Initiative Petition that	
				stopped the 6 laning of A1A!	
				Thank You for your consideration of this matter and any assistance that you may	
				provide!	
6/7/2022	Lori Nadine Sheres	Email/ In-Person Open House	loridine511@gmail.com	I have a couple of suggestions for improvement in the Southern Brevard area.	These comments were read aloud during the Open House on June 7, 2022.

6/7/2022	Charlotte Balchunis In-Person - Open House	crbhomes@gmail.com	Pineda Causeway: has difficulty entering and exiting the two subdivisions between Fringetree Lane and Peninsula Circle. A traffic light is needed. Traffic backs up to Grand Haven. There have been 45 sandhill cranes deaths this year; she is working with Tim with FWC to document; perhaps signage is needed. Sidewalks are so close, too close to the causeway. She is concerned that there will be more pedestrians killed there and that there is a need for more safety provisions. Speed needs to be lowered on Pineda causeway.	GG via email on 6/14/22: Good Morning Charlotte, Thank you so much for attending the Space IPO's Annual Open House, As you mentioned, Commissioner Smith and county staff have been working on these issues. I was able to follow-up with Carrina Currin, Brevard County Iraffic Ingineering. The Space Coast IPO is only involved in projects regarding state and federal transportation funding. This is a county facility and we have no jurisdiction over this roadway. The County is aware of the concerns and various efforts have been underway to address the issues. Below are Corrina's responses. Comment #1: CONCERNI; it is very difficult to make a left turn at the 2 subdivisions on Pineda Causeway at Fringetree Lane and Peninsula Citcle. RESPONSE: Staff recently conducted a traffic signal warrant analysis in response to a request from the Grand Haven community to signalize this intersection. Traffic signal warrants are criteria established by the Federal Highway Administration in the Manual on Uniform Traffic Control Devices, the national standard for traffic control which control belone, the national standard for traffic control which control belone, the national standard for traffic control which control belone, the national standard for traffic control which evolutes generated by the Suddivisions is to ole who to meet the minimum threshold for the volume warrants. As such, we cannot legally ustify signalizing the intersection to low to meet the minimum threshold for them furning the considering alternative strategies such as a Restricted Crossing U-Turn (RCUT) Intersection. This intersection modification would prohibit left turns from the side street and would instead have them furning the control strategies and the side direction. Comment #2: CONCERN: 45 sonabilit cranes have been killed and she is working With Tim at PWC to document RESPONSE: There are a number of Wildlife Crossing signs currently in place along Pineda Causeway. Staff will survey the existing signs and consider whether additional signs or needed.

6/7/2022	Jo Ellen Dessert	In-Person - Open House	dessertj@aol.com	trail once a month and uses the facilities to go to lunch. She would like to see the trail go down to Vero. She is concerned with the safety for bicyclists. If you want to ride 40 -1 00 miles, trails are the best option due to safety. She would like to see the trail go down to Vero. She wants to know who to contact and how to get matching.	SK via email on 6/28/22: I wanted to reach out to regarding your public comment at our recent Open House on June 7, 2022. I appreciate your comments and insight regarding the trail systems in Brevard and we absolutely see the need for more trails and better connectivity. The Space Coast TPO has a long history in trail planning and hope that Brevard will eventually have the system you would like to see. I would like to share with you a couple of maps that can be found within our Bicycle & Pedestrian Master Plan. Please visit: https://www.spacecoasttpo.com/home/showpublisheddocument/374/637600064429970000 Please refer to page 20 – 36. • Figure 43 is a map of the SUN Trail Network – these are SUN Trail designated trails, and can receive funding via the state funded SUN Trail Network. Municipalities must apply for this funding. They have cancelled the annual call for projects the last couple of years. • Figure 44 is the currently adopted Office of Greenways and Trails Trail Network • Figure 45 is our Showcase Trails Network. This is a series of trails that we strive to work with local municipalities to get implemented in order to create a spinal network in Brevard County. And page 36 – 37. • Figure 67 and 68 are in reference to the East Coast Greenway. Please let me know if you have any more questions or comments regarding trails.
6/7/2022	Bill Fisk	In-Person - Open House	wafisk61@gmail.com		SK via email on 6/28/22: Hi Terry, At our Annual Open House on June 7, 2022 we received the following comment from Mr. Bill Fisk: Brevard County needs better public transportation, tramways. Have a lot of people who can't afford cars or gas. And tramways would be a good solution. If you continue to widen roads, cars will fill the road. Following the formal presentation, Mr. Fisk and I chatted about transit and some of the needs. I also let Mr. Fisk know that Space Coast Area Transit is currently in the process of updating their Transit Development Plan and I would pass along the information. I have included Mr. Fisk on the email for any follow-up activities.
6/7/2022	Bill Hodge	In-Person - Open House	billhodge@juno.com	Roundabout in cape Canaveral: A1A, does not see that a roundabout as a good solution. Would much rather have a 4-way light intersection, which is what the community asked for.	FDOT D5 Project Manager, Anthony Miller, followed up with Mr. and Mrs. Hodge about their concerns via email on 7/8/22.
6/7/2022	Erik Hougland	In-Person - Open House	erik.hougland@gmail.com	Primary issue is long distance tricycling. Not safe trails all the way through Brevard County. North Trails are good. South Trails are good but middle trails are less than good. Titusville to Melbourne Beach is spotty. 100 Florida trails.com good trails are listed on this website. We can add additional trails to this website. We have poor bicycle facilities and we also need to look for ways to improve east west travel.	
6/7/2022	Sandra Sullivan	In-Person - Open House	vote@sandrasullivan.com	Pineda at Wickham: has the new system reduced crashes? The area is backed up a lot; are we doing a traffic study when snowbirds are here? What is the county doing for Vision Zero? A1A mid-block pedestrian right of way obstruction in the roads.	KS via email on 6/28/22: Recently you submitted questions during a Space Coast TPO public comment period. I wanted to provide you some information on those questions. Vision Zero- As of today the Space Coast TPO and 10 municipal agencies have adopted the goal of zero. We are in conversation with some of the remaining cities and they may be fairly close to adopting. Specifically as it concerns Brevard County. They have not officially adopted the zero goal as of now. However we have been in discussion with them and provided them draft language for a Vision Zero resolution. We are hopeful they will adopt. Concerning Pineda and Wickham. This is an area that has been receiving considerable attention recently. While I do not know the specifics Brevard County has done some signal timing on the Pineda corridor and other improvements are being planned. For full details on any future plans you should contact Brevard County Public Works.

6/8/2022	Email	ocmary2009@gmail.com	an accident(s) waiting to happen. Not to mention the astronomical cost. Might check with the municipality's that are removing them in the north due to accidents. I've heard multiple horror stories about	AH via email on 6/28/22: Good Afternoon, Thank you for submitting your comments and feedback regarding the proposed FDOT safety enhancements and roundabout on A1A, in Cape Canaveral. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program. Public involvement is vital to our process and we appreciate you taking the time to share your input. The Space Coast TPO is continuing to work with the City of Cape Canaveral and the Florida Department of Transportation to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. If you know of any other community group that would benefit from a small group meeting to share concerns or to share more about this project, we recommend reaching out to: • Anthony.Miller@dot.state.fl.us • Lori.Trebitz@dot.state.fl.us I have also attached a project FAQ that talks more about the safety enhancements and functions of the modern roundabout. Thank you for your time.
6/8/2022 John Gyllin, Ed.D	Email	gyllinj@seminolestate.edu	Regarding the proposed roundabout in cape canaveral, love it, do it and many do not know how much more efficient t safe r it will be. Thank you.	AH via email on 6/28/22: Good Afternoon Dr. Gyllin, Thanks so much for submitting your comments regarding the improvements, including a proposed roundabout for A1A in Cape Canaveral. We agree modern roundabouts are an amazing tool for street design. They are safer, more efficient, better for the environment, and cheaper to maintain than traditional intersections. We will continue to work with FDOT District Five, the City of Cape Canaveral to explore how a modern roundabout could help make S.R. A1A safer for everyone. Part of this will be to continue to support education opportunities amongst Cape Canaveral citizens and the community at large by participating in small group discussion, facilitated by FDOT District Five. Again, we thank you for your input and support. Public feedback is essential to the transportation planning process.
6/11/2022 Stacey Sharp	Email	vermontpines@aol.com	I am deeply opposed to the new roundabout. Not for the usual reasons, but for the removal of the light. Right now, the ONLY way to make a left turn from A1A to side streets or businesses, or to make a left turn onto A1A, from those same businesses and residential side streets, is to wait for a break in the A1A traffic created by the light changing. This is also true for pedestrians who want to cross A1A. This is true from Buchanan Avenue in the south, all the way up to the Post Office. Removal of this light is going to create a steady stream of traffic that will make it impossible to turn/cross. A1A in this area is already one of, if not 'the', most dangerous area in Brevard. Removing this traffic controlling light is only going to make it MORE dangerous. One fewer light, to satisfy the Port, isn't worth the increased carnage/accidents. Is the state willing to assume liability for the increased numbers of accidents, pedestrian deaths? Thank you for your consideration of these thoughts.	Public involvement is vital to our process and we appreciate you taking the time to share your input. You make some very interesting observations and suggestions, specifically in regards to traffic safety and road user movements. The Space Coast TPO is continuing to work with the City of Cape Canaveral and the Florida Department of Transportation to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. If you know of any other community group that would benefit from a small group meeting to share concerns or to share more about this project, we recommend reaching out to: • Anthony.Miller@dot.state.fl.us

6/11/2022 Stephen Wilson	Email	midair55@gmail.com	lived in Viera and passed through the roundabout on Wickham Road 2x on week days and now reside in Cape Canaveral a block north of the proposed roundabout, I feel that I have a good perspective from a frequent user of a roundabout. Most drivers do not know the rules of a roundabout. Even though signage at the one in Viera clearly shows the routes, these are ignored, are not comprehended or unaware. I'm sure the Planning Office is aware there are numerous accidents at the Viera roundabout which are most likely due to the lack of not observing the	Public involvement is vital to our process and we appreciate you taking the time to share your input. You make some very interesting observations and suggestions, specifically in regards to traffic flow, congestion, and crash potential. I would like to note, that the infrastructure you are referring to in Viera is not considered a true roundabout, that is a traffic circle and they operate differently. The Space Coast TPO is continuing to work with the City of Cape Canaveral and the Florida Department of Transportation to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. If you know of any other community group that would benefit from a small group meeting to share concerns or to share more
6/11/2022 Katie Jenkins	Email	katos3@hotmail.com	I strongly oppose the planned roundabout in Cape Canaveral. They are confusing to drivers and with the tourist traffic we have here there will always be a lot of drivers unfamiliar with the area who won't be able to navigate it easily. It will cause more accidents and will be dangerous. Please don't move forward with this!	AH via email on 6/28/22: Good Afternoon Ms. Jenkins, Thank you for submitting your comments and feedback regarding the proposed FDOT safety enhancements and roundabout on A1A, in Cape Canaveral. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program. 6/13/2022	Heidi Senger	Email	hdsenger@yahoo.com	driven through many. But I am opposed to this one. I am a cape canaveral resident. These are my reasons: 1. Often times high volume of traffic going north/south. It would be very difficult for east/ west to merge in. 2. The other day after a lightning strike the lights there were flashing yellow for north/south and flashing red for east/west. It took us 15 minutes to be able to make a left turn from Atlantic going south into A1A. 3. It has a lot of bike and pedestrian traffic. The roundabouts I'm familiar with do not. 4. Many drivers who are aware of area will opt to take cape canaveral streets to avoid roundabout. Our streets are not made for that kind of traffic. Many have no sidewalks. They're narrow with poor visibility at corners. Not fair to residents. 5. Trying to cross A1A on foot between Cumberland/Atlantic and next light at central will be impossible with out lights at each end to give gaps in traffic. 6. Lastly, we've been in a roundabout when there's been an accident. You may be stuck a long time. What's the alternate route?	AH via email on 7/14/22: Good Afternoon Ms. Senger, Thank you for submitting your comments and feedback regarding the proposed FDOT safety enhancements and roundabout on A1A, in Cape Canaveral. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program. You raise some really interesting points regarding traffic movements and patterns in the area of this proposed project. I want you to know that we value your input as a resident. I have attached a project FAQ that talks more about the safety enhancements and functions of the proposed modern roundabout, and I would encourage you to take a look at it if you have not. Here is a video simulation that also shows the whole project and how pedestrians and bicyclists can use the roundabout to cross: https://www.facebook.com/CityofCapeCanaveral/videos/597470404765596 Public involvement is vital to our process and we appreciate you taking the time to share your input. The Space Coast TPO is continuing to work with the City of Cape Canaveral and the Florida Department of Transportation to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. If you know of any other community group that would benefit from a small group meeting to share concerns or to share more about this project, we recommend reaching out to: Anthony.Miller@dot.state.fl.us Lori.Trebitz@dot.state.fl.us Thank you for your time.

6/14/2022	Scott Stratford	Email	tnswas@juno.com	We are way opposed to this proposal. Lived here for a long time, and this is a foolish idea !!! It would make traffic matters worse.	AH via email on 7/14/22: Good Afternoon Mr. Stafford, Thank you for submitting your comments and feedback regarding the proposed FDOT safety enhancements and roundabout on AIA, in Cape Canaveral. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program. Public involvement is vital to our process and we appreciate you taking the time to share your input. The Space Coast TPO is continuing to work with the City of Cape Canaveral and the Florida Department of Transportation to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. If you know of any other community group that would benefit from a small group meeting to share concerns or to share more about this project, we recommend reaching out to: • Anthony.Miller@dot.state.fl.us • Lori.Trebitz@dot.state.fl.us I have also attached a project FAQ that talks more about the safety enhancements and functions of the proposed modern roundabout. Thank you for your time.
6/14/2022	Gary Rickle	Email	sailtime@hotmail.com	I oppose a roundabout. I have driven in countries that use them extensively and found that they work well, but the difference is that they are accustomed to using them. Americans are just confused and have no idea of how they work. Even if the locals learn how to use it we are still faced with a very large number of tourists who will have no experience. The simple and effective solution is to make this intersection a 4 way intersection with lights. The cost would be a fraction of a roundabout and only require a small amount of land acquisition. Thanks for considering my thoughts.	AH via email on 7/14/22: Good Afternoon Mr. Rickle, Thank you for submitting your comments and feedback regarding the proposed FDOT safety enhancements and roundabout on A1A, in Cape Canaveral. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program. You raise some really interesting points regarding traffic movements and patterns in the area of this proposed project. We understand that this type of infrastructure maybe uncomfortable for both residents and tourists to navigate. However, compared to a traditional intersection a modern roundabout reduces conflict points from 32 in a traditional intersection to only 8 in a roundabout. I have attached a project FAQ that talks more about the safety enhancements and functions of the proposed modern roundabout, and I would encourage you to take a look at it if you have not. Public involvement is vital to our process and we appreciate you taking the time to share your input. The Space Coast TPO is continuing to work with the City of Cape Canaveral and the Florida Department of Transportation to address these public concerns, as we know it is a sensitive subject and many residents have cause for concern. If you know of any other community group that would benefit from a small group meeting to share concerns or to share more about this project, we recommend reaching out to: • Anthony.Miller@dot.state.fl.us • Lori.Trebitz@dot.state.fl.us Thank you for your time.
6/14/2022	William Barnes	Website	WCBComms@gmail.com		AH via email on 7/14/22: Good Afternoon Mr. Barnes, Thank you for submitting your feedback regarding your concerns about the Sea Ray Drive bridge. Unfortunately, the Sea Ray Drive bridge is project maintained by Brevard County Public Works Department, I'd encourage you to voice your concerns by reaching out to Road & Bridge Maintenance, Susan Jackson, Assistant Director, Road & Bridge Manager. You can call (321) 617-7202 or email susan.jackson@brevardfl.gov. Public involvement is vital to our process and we appreciate you taking the time to share your input. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program. Thank you for your time.

6/16/2022	Tracy-Heather McInto	Email	sunnsand771@gmail.com	safety of an intersection and for enhancing the appearance of the City of Canaveral without eliminating charm and actually enhancing its residential appeal by the beach. The roundabout design, with incoming boulevards, I believe would promote lowering speeds and provide for a traffic calming element. I was troubled by the public comment made by a Cape Canaveral resident stating, "The roundabout in Viera has resulted in fatalities." This is not typical of roundabouts as roundabouts usually result in reduced fatalities and	AH via email on 7/14/22: Good Afternoon Ms. McIntosh, Thanks so much for submitting your comments regarding the improvements, including a proposed roundabout for A1A in Cape Canaveral. We appreciate your input as a resident in this area of the proposed projects. We agree modern roundabouts are an amazing solution for street design. They are safer, more efficient, better for the environment, and cheaper to maintain than traditional intersections. In response to the comment made at the Open House, this citizen was misinformed. After the meeting, our staff spoke more in depth with them and relayed that while the Viera traffic circle has seen numerous crashes, there have been ZERO traffic-related fatalities. The only fatality at that traffic circle was due to a medical episode, which tragically resulted in the motorist veering off course into a nearby pond. We will continue to work with FDOT District Five, the City of Cape Canaveral to explore how a modern roundabout could help make S.R. A1A safer for everyone. Part of this will be to continue to support education opportunities amongst Cape Canaveral citizens and the community at large by participating in small group discussion, facilitated by FDOT District Five. Again, we thank you for your input and support. Public feedback is essential to the transportation planning process. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program.
6/17/2022	Larry McInerney	Email	sedation4@yahoo.com	The sheer volume of North- and South-Bound traffic, on A1A, will	AH via email on 7/14/22: Good Afternoon Mr. McInerney, Thank you for submitting your comments and feedback
				overwhelm the planned roundabout in Cape Canaveral. Local commuters may get accustomed to the proposed traffic circle, but tourists will have no-clue to its orientation or function.	regarding the proposed FDOT safety enhancements and roundabout on A1A, in Cape Canaveral. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program.
					You raise some really interesting points regarding traffic movements and patterns in the area of this proposed project. In regards to traffic volume, yes you are correct, it will have more volume, however; the infrastructure in Viera is not considered a real roundabout. The proposed modern roundabout for this area accounts for the vehicles you mentioned as well as a higher volume of cars.
				Comparing this project to other roundabouts, around the county, is	I have attached a project EAO that talks more about the safety enhancements and functions of the proposed modern
				unrealistic. A1A has significantly more heavy/oversize commercial traffic than circles in Viera or Melbourne.	roundabout, and I would encourage you to take a look at it if you have not. I'm also attaching some graphics about traffic flow movements. Here is a video simulation that also shows the whole project and how pedestrians and bicyclists can use the roundabout to cross: https://www.facebook.com/CityofCapeCanaveral/videos/597470404765596
					roundabout, and I would encourage you to take a look at it if you have not. I'm also attaching some graphics about traffic flow movements. N/A	Mary Pinizzotto	DRAFT FY 2023-27 Comment Portal	mzzotto@comcast.net		SK via email on 6/28/22: Thank you for your comment as see below: Continually, there is no work being done/considered on the south beaches area of Brevard past Melbourne Beach. The ped way, which is now extensively used by bicyclists, runners and walkers is in disarray from the multitude of golf carts, landscape equipment, mail trucks and construction equipment. There are huge pot holes, edges broken down, debris continually on the trail. In addition, someone has approved the removal of the pedway for driveway construction of the various homes along the pedway causing mismatch of 1-2 inches in the path prone for injury to those that use this means to travel. In regards to the maintenance of the multiuse trail in Brevard County, I would encourage you to reach out to Brevard County Public Works as the maintaining agency. I have included Susan Jackson with Brevard County Public Works on this email. I have also included Stephanie Moss with FDOT. FDOT has recently began a SR A1A Strategic Plan. The plan will develop actionable steps towards a safer, more multimodal A1A. Stephanie should be able to answer any questions regarding the project, or get you in contact with someone from FDOT who can. Thanks again for reaching out.
N/A	Bruce Jankowski	DRAFT FY 2023-27 Comment Portal	jelly201@aol.com	instead of traffic lights they went to clover leaf type bridges with continuous feed lanes was expensivebut it gets more expensive when population growsand you have to come up with a solutionnote: Paramus had 4 shopping malls , that New Yorkers	AH via email on 7/15/22: Good Afternoon Mr. Jankowski, Thanks so much for submitting your comments regarding you experience with traffic circles/roundabouts in New Jersey and New York. You raise some really interesting points regarding traffic movements in these type of infrastructures. Modern roundabouts are an amazing solution for street design. They are safer, more efficient, better for the environment, and cheaper to maintain than traditional intersections. We understand that this type of infrastructure maybe uncomfortable for both residents and tourists to navigate. However, compared to a traditional intersection a modern roundabout reduces conflict points from 32 in a traditional intersection to only 8 in a roundabout. Again, we thank you for your input and support. Public feedback is essential to the transportation planning process. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program.
	Carol Mauter	DRAFT FY 2023-27 Comment Portal	Carolteny@gmail.com	Please have more & known bus transport to eliminate high auto traffic danger, complaints from tourists, & resident gas cost & unavailable auto parts. Encourage a train stop in Brevard. Discourage roundabouts & research number of the roundabout auto accidents.	AH via email on 7/15/22: Good Afternoon Ms. Mauter, Thanks so much for submitting your comments on potential transportation improvement in our area. You raise some really interesting points and I wanted to respond to a few suggestions. •Transit: We work in close coordination with Space Coast Area Transit, which is area for the demand of more route services and transit options. We will continue to work together to monitor the needs of our County to ensure that we provide safe and equitable access for all. •Brevard County Brightline Station: It's always been a part of Brightline's long-term vision to have a station in Brevard County. But they must first get the Orlando to West Palm section up and running. This extension is their primary focus. Once that is complete and operational, there would need to be a ridership analysis or study done to determine if it would make fiscal sense to build a Brevard station. The SCTPO did conduct a Station Location Study a few years back as a point of reference. For more information or history, check out our Rail page: www.spacecoasttpo.com/what-we-do/projects/rail-projects •Roundabouts: Modern roundabouts are an amazing solution for street design. They are safer, more efficient, better for the environment, and cheaper to maintain than traditional intersections. We understand that this type of infrastructure maybe uncomfortable for both residents and tourists to navigate. Unfortunately, many in our county frequently refer to the Viera traffic circles when they think of a roundabout, but modern roundabouts are constructed differently. Compared to a traditional intersection a modern roundabout reduces conflict points from 32 in a traditional intersection to only 8 in a roundabout. Again, we thank you for your input and support. Public feedback is essential to the transportation planning process. Your comments will be submitted as part of the Public Comment document for the DRAFT FY 2023-27 Transportation Improvement Program.
