Space Coast Pathways Project

An Interactive Guide to Brevard's trails, waterways, sidewalks, bike lanes and unique outdoor adventures.

Pathways Project Transportation Goals

- Increase safety for non-motorized users
- Enhance connectivity between modes, for people
- Increase accessibility and mobility of people
- Support economic vitality of the area

Pathways Project Mapping Challenge

Do you track your running and bicycling performance? If so, consider using Strava – a free app for iPhone and Android – and you could help create better bicycle and pedestrian facilities throughout the Space Coast and Florida.

The Florida Department of Transportation (FDOT) and the Space Coast Transportation Planning Organization (SCTPO) are using data from Strava. Personal information is not shared, but the data can highlight trends and routes, revealing the effectiveness of existing facilities and identifying where bike lanes or traffic calming measures are needed.
